

New Software Release ADS258 - Fiat® 2016

January 2017

Advanced Diagnostics is pleased to announce the release of Fiat® 2016 (ADS258) software for various makes and models.

What does the software do?

ADS258 key programming software now includes pincode reading and precoding for the Fiat® 500 and various other models. For an improved, time saving and streamlined procedure, precoding can be performed seamlessly in the background using the Smart Aerial and Smart Dongle, enabling the locksmith to precode a blank transponder without having to switch to another device or tool.

Customers that have not purchased the Smart Aerial have the option of using Silca RW4 Plus/Fast Copy Plus and the ADC243 cable for precoding.

MVP Pro users: one token will be deducted for precoding and one for key programming.

What software and products will I need to program / precode keys for Fiat® Group vehicles?

Pro Tester

US Patent Number 7,315,238 B2

ADS185 Software

Smart Dongle + Smart Aerial

RW4 Plus/Fast Copy Plus + ADC243 Cable
