

REP WEAVE INFORMATION

Yarn Size	Yards Per Pound	Suggested Sett
3/2	1,260	18/36
12/6	1,680	20/40 *
5/2	2,100	24/48
8/2	3,360	30/60
10/2	4,200	36/72 or 40/80
16/2	6,720	45/90

*have not tried, this is an estimate

Formula to calculate warp length:

Finished length + hems (triple fold, turn twice, about 3" each end) + 10% shrinkage = x + 18% take-up + loom waste = warp length

Weft suggestions – I use the 8/16 mop cotton for weft regardless of the size of the warp yarn used. I triple the mop cotton by winding it on my warping board, 3 times then winding it on a ski shuttle. For the thin weft I use the same yarn as what is used in the warp, this is what I use for the hem also. This combination beaten firmly will give approx 4 picks per inch thick and thin, 8 total picks.
