#26 CLARISSA STEFANIA AND MICHELE RUSSO

New Tatter-a-fact® Episode!

Episode #26

On this new episode of Tatter-a-fact I am joined via Zoom with Clarissa Stefania and her husband & business partner Michele Russo. We talk about Clarissa's beginnings with PMU, our thoughts on saturation and pixels, developing her Blush to Bold pigment line, and how she keeps a healthy work/relationship balance with her husband!

These are topics we talk about:

[Clarissa Stefania's beginnings with PMU](#)

[What are our thoughts on saturation and pixels?](#)

[Maintaining a healthy work/relationship balance while creating a pigment line](#)

[This or That? A Question Lightning Round!](#)

One Standard For All: Li Pigments® Response to REACH

EU REACH is a part of the EU regulatory system. It is a regulation which improves the protection of the human health and the environment from risks that can be posed by chemicals. REACH stands for Registration, Evaluation, Authorization and Restriction of Chemicals. Below is a link to the new list of colorants, ingredients and substances that are now banned in the EU starting January 4th, 2022.

[Banned List of Colorants, Ingredients and Substances](#)

This new list of banned colorants, ingredients and substances affected all PMU and Body Tattoo pigment manufactures. Li Pigments® is proud of all its hard work during 2020 and 2021 to reformulate and meet these new restrictions and limitation requirements established by EU REACH that is now in full effect.

Li Pigments® is even more proud of....

Do you have a grip on things?

What determines the level of saturation?

There are so many ways to grip your machine...all of them are right if the machine feels comfortable in your hand, you have control of the machine, precision and stability.

Although we want control, precision and stability with our machines...we don't want to grip it too tight. With a really tight grip you may lose fluidity and your hand can cramp and ache at the end of a procedure.

In our hands on Machine & Movements Course...we take microbladers and hand tool users to machine. We teach the six core movements made in PMU and give them the confidence they need to make a smooth and successful transition.

If you want to learn more check out the [Machine & Movements Course](#) on the Girlz Ink Online Academy or keep reading for our upcoming hands on class!!

Class will be held on 6/25/2022 at 9am (PST)

Includes Continental Breakfast, Lunch, Goodie Bag, Detailed Handout, Certificate and Lifetime Support!

12 Month Access to Teryn's Machine & Movements Online Course
