#67 AMY & REN

New Tatter-a-fact® Episode!

The Future of Trainings + Trends to Look for in 2024
Episode #67 with Amy & Ren

On this episode of Tatter-a-fact PMU Podcast I'm joined by two of my Girlz Ink Girlz, Amy Owens and Ren Taylor! We talk about what we've accomplished this year and what we're looking forward to doing next year. We take note of the cyclical nature of this industry; trends, changes, and how "bad" trainers are luring in students. The future of training depends on quality trainers and the community you build! Plus, the Girlz and I talk about the pros and cons of being a solo artist vs working in a collective of artists. Tune in for this FINAL episode of season 3 and of 2024!

FACE AND BODY NUMBING AGENT ALTERNATIVES: YOUR NEXT FAVORITE NUMBING!

Face and Body Numbing Agent Alternatives: Your Next Favorite Numbing!

As many of you know Face and Body shut their doors effective December 15, 2023. We've seen many artists freaking out that their favorite numbing agents are leaving the industry for good. We understand and we have the alternatives you've been looking for!

First off, don't worry too hard for now. We have stocked up and still have some of your favorite Face and Body numbing agents in stock and available, but...

When It Comes to Needle Selection, You Have to Think About Skin Type

Skin type varies among clients, and it's important to choose a needle configuration that works well with the specific skin texture and thickness to ensure we're efficient. When we work more efficiently and spend less time in the skin, less trauma is done to the skin and the results heal better!

Why choose the Girlz Ink OMG® Cartridge Needles? They produce less skin trauma!

- ✓ Every needle in the collection is made with a fine, long taper that produces a smaller puncture which in turn creates less skin trauma.
- ✓ To compliment the long taper, every needle is highly polished creating less friction and less skin resistance as the needle moves in and out of the skin resulting in less skin trauma!
- ✓ Less friction = less trauma = less time in skin = better results!

Stay safe and happy tattooing!
