- **Skin Protection** – Handle with gloves. Suitable gloves include latex, nitrile, butyl rubber, neoprene, norfoil, and vitron, depending on extent of contact. Gloves must be inspected prior to use. Use proper glove removal technique to avoid skin contact with the product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.
- **Body Protection** – Wear impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the particular workplace.
- **Respiratory Protection** – When risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
- **Control of Environmental Exposure** – Prevent further leakage of spillage if safe and feasible to do so. Do not let product enter the drains. Discharge into the environment must be avoided.
