

AQUA™ & VELVET™ COLOR INDEX CHART (CIC)

IMPORTANT: While each pigment is in a Fitzpatrick category, this does not mean it can only be used on that skin tone. Refer to the scale to see what Fitzpatrick skin tone is recommended for each pigment. Use artist discretion.

NOTE: Some variables may lead you to choose a color outside of our recommendation including, but not limited to: dilution, eyebrow & hair color, and client's desired result. Selection and suggested pigment will vary depending on needle and technique chosen. Darker colors tend to be chosen when using a single needle. Lighter pigments tend to be chosen when using bigger needles.

Internally balanced with our Fusion based color-neutralization technology to prevent warm or gray fading.
