Diamond  
Frying Pan

## Precautions for Safe Use

- Before using the Solar Diamond Frying Pan for the first time, wash it with a mild detergent and dry it thoroughly. Then season the pan by pre-heating it with low heat and applying a layer of cooking oil to the pan, rubbing with a paper towel until the inside of the pan is thoroughly coated.
  - After each use, it is recommended to clean the pan by simply wiping it clean with a kitchen paper towel rather than washing with water.
  - If the pan has been washed with water, it must be re-seasoned by pre-heating with a coat of cooking oil on it.
- 
- Before using the Solar Diamond frying pan for the first time, wash it with a mild detergent and then it is ready for use.
  - Always hold the Solar Diamond frying pan by the handle while cooking.
  - It is recommended to use a wooden spatula instead of metal cooking tools while cooking.
  - Avoid heating an empty pan.
  - It is recommended to cook at low to medium heat settings, as product damage and odor may occur due to the burnt handles if cooking over high heat or for many hours.
  - The Solar Diamond frying pan stays very hot even after the heat setting is turned off. Be careful not to touch the hot frying pan as burns may occur.
  - Wait for the Solar Diamond frying pan to cool down before washing it due to possible injury or product damage.
  - In case that the tempered glass lid sill remains hot, do not sink into cold water and cool it off before washing. If not, it can be breakable.
  - Do not move the pan while it is still hot as it is dangerous.
  - Do not store food in the pan as it may result in corrosion.
  - Clean with a soft sponge or cloth instead of a metal scrubber.
  - In the event that any screws in the lid handle come loose, a screwdriver may be used to tighten the screws.
  - The Solar Diamond Frying Pan can be used on gas stoves and hot plates.
  - Do not use the Solar Diamond Frying Pan on induction tops, in microwaves or ovens.
  - Do not drop the Solar Diamond Frying Pan as the heavy impact may damage the product.
  - The Solar Diamond Frying Pan cannot be returned or exchanged after using or washing it.
  - Keep away from Children.

## How to extend the life of the Solar Diamond Frying Pan

## Diamond Coating

The coating effect is very powerful and solid thanks to its strong five-layer of diamond coating so that the product displays its resistance to scratch, abrasion and corrosion along with excellent nonstick function making food rarely adhere to it as well as good cleaning effect.

## Porcelain Coating

Its exterior is resistant to scratch and peel-off thanks to porcelain triple coating applied to the product. The exterior coating is created by natural mineral, frits which often refers to typical glass. It employs environment-friendly and well-being porcelain coating washable with less water and detergent.

## Special Forging Technology

The wrap resistant Solar Diamond Frying Pans composed proprietary 2500 ton special forging process. Additionally, the rim is ergonomically designed for an easy pouring the food.
