KAISER BAAS

X350
Quick Start Guide

Visit kaiserbaas.com for more information

Before operating your X350 please ensure you have read and understood the safety precautions

Please ensure you remove the plastic protection film from the front lens and back screen before using.

1

Remove the camera from the Waterproof case. Release latch to unlock casing.
2

Charge your X350

Connect your camera to a USB charger (not included) or computer using the included Micro USB cable. Whilst charging the red light will appear. Once fully charged it will turn off.

3

Insert your SD Card

Once your camera is fully charged, insert the Micro SD card (not supplied) into the SD card slot. We recommend using a Class UHS 1 and above Micro SD card up to 64GB for maximum performance.

Note: Please ensure you format your SD card before you start filming with it for the first time.
Format your SD Card before using the camera for the first time

3

When the camera is turned on, press and hold the Record/OK button until the menu appears. Select the Settings mode using the Up/Down Arrow Buttons on the side of your camera and press the Record/OK button to confirm.

Press the Mode button and select the General Settings.

Scroll down the menu using the arrow keys on the side until you get to Format SD Card. Select Format SD Card and press the Record/OK button. Select Confirm to format your SD Card.

Format SD Card

Using your Camera

1

To turn your camera on/off - hold the Power/Mode button on the top of your X350 for few seconds.
