Voice  
Changer

We thank you for purchasing this product, which will certainly give you great satisfaction. It is the result of careful planning and excellent quality thanks to the use of selected components. This microphone offers the possibility to sing your favorite songs by amplifying both music and voice. You can also apply special effects to your voice, activate the echo function and manage the lighting mode of the led ring for an extraordinary "PARTY" effect.

### Power supply

The microphone is powered by an internal battery that can be recharged via the supplied USB - Type-C cable. The cable must be connected to the TypeC socket. The LED will light up and then turn off when recharge is completed. During the recharging process you can still use the microphone, for example by connecting it to a small power bank. To turn the microphone on or off, press and hold the on/off key.

### Micro SD

It is possible to insert a microSD card into the slot on the bottom to play audio tracks from it. The compatible formats are: MP3, WAV, WMA, FLAC, APE. The card must be in FAT32 format and with a maximum memory of 64GB.

### Source selection

By pressing the M button you can skip from the bluetooth source to the songs on your microSD card. If no micro SD card is present, the microphone will automatically skip to the bluetooth mode.

### Bluetooth pairing

Once you have turned on your microphone and set the bluetooth mode you just have to search for "IMGadgets karaoke" it in the bluetooth section of your smartphone/tablet and pair it. No password is required. The blue flashing of the led indicates successful connection.

### Volume adjustment

Thanks to the + and - keys you can adjust the voice volume. By pressing them while playing a track it is possible to change the volume of this track.

### Voice effects

You have the possibility to apply 4 different effects to your voice. Press (🎤) to skip from an effect to another and go back to the original voice.

### Echo effect adjustment

By pressing twice the key + or - you can adjust the echo effect.

### Track selection

While playing a track (both via bluetooth and via USB/micro SD) you can pause or restart playing by pressing the key (ON/OFF). To skip to the following track press and hold the key (M). To go back to the beginning

of the track or skip to the previous track press and hold the button (🎤).

### Recording

It is possible to connect to the TypeC socket the cable of a compatible smartphone. By downloading a recording APP you can record both music and your voice directly on the smartphone. Moreover, with the cable connected, the microphone can be used also as a speaker to play audio from your smartphone. The cable is not included in the package.

### Headphone socket

For better listening, it is possible to use an ordinary headphone, equipped with a 3.5mm stereo jack. Just connect it to the specific socket. In the recording mode (bluetooth connection to receive music and USB cable connected to the smartphone for recording), by connecting the headphone you will hear the music in the headphone, while the recording on the smartphone will be of the voice only.

### Light effects management

The microphone can play 5 different light effects. Press twice quickly the button M to skip to the following effect. There are 5 light effects + off available.
