The Stackable Coding Robot
Product Manual

Getting Started

Step 1 Assemble the robot

Each hat has its own basic game. Stack base, body and head together and press tight. Then choose the corresponding hat and insert it in TacoBot's head.

Step 2 Activate and play!

Turn on the power switch, press the "belly" button to activate the hat and enjoy.

Entertaining Mode_TacoBot is a by default a robot toy!

TacoBot is programmed with a game mode for each hat by default. These modes encourage kids to interact with TacoBot in a quick and funny way.

Tracking Hat

Exploration Mode_Turn TacoBot into a education robot

Step 1 Download the exploration mode

With the app, download the exploration mode into TacoBot, which matches the hat and the game manually you choose.

Note: When downloading, The power must be on and the belly button is deactivated.

Step 2 Create a game environment accordingly

Create a game environment according to the game manual you've chosen. Put TacoBot in the corresponding position, arm it if necessary.

Let's get started!

Awards

There are different badges corresponding with different game manuals. It is suggested parents reserve badges first and give kids as awards when they finish different explorations.

Thus can encourage kids' more passion for exploration!

▲ Sticker Medal for Taco

TacoBot

Download TacoBot APP to enjoy more functions and games.

Discover more contents to be expanded in the APP to get further improvement.

TacoBot has two kinds of Bluetooth. They will get connected automatically after being connected for first time.

1. Connect the Bluetooth in the APP to control TacoBot's movements.
2. Go to device's set up interface to connect TacoBot audio Bluetooth.
