WE DO MORE THAN RAISE THE BAR
KOLD-DRAFT COCKTAIL SERIES ICE MACHINES

THE ONLY CUBE OF IT'S KIND

Kold-Draft Cocktail Series Ice Machines provide you with pure, hard slow melting solid large ice cubes for your top-shelf drinks, whether you are sipping your favorite beverage at home or at your local establishment. Kold-Draft Cocktail Series Ice Machines provide a cube that will not alter your beverage, it will simply enhance the taste of it.

Kold-Draft Cocktail Series Ice Machines produce the largest cubes (1.1 x 1.1 x 1.25") within its footprint compared to most competitor units within its class. Available in three models, the KD-50, KD-70 and KD-110, the air-cooled, self-contained models offer some of the best recovery rates. The ice machines will produce ice up to 110lbs and store from 26lbs to 60lbs of ice.

The space saving design features a stainless-steel exterior with a front door panel door that is ideal for entertainment such as bars, restaurants and hospitality environments.

In addition, the cocktail series ice machines can be installed in a residential application where ice is needed for entertaining. Kold-Drafts horizontal evaporator design allows for water to be sprayed upward into the evaporator cells, freezing individual cubes within each cycle. The outcome is large cocktail cube that is a pure, hard and has a slower melting rate.

Choose Kold-Draft Cocktail Series Ice Machines for your top-shelf beverage needs. The largest cube in its class.

KD-110

- Produces up to 110 lbs of ice / day
- Ice storage capacity of 60 lbs
- Measures 24.8" x 20.7" x 36.7"

KD-70

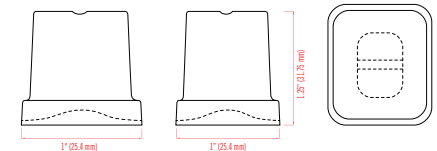

- Produces up to 70 lbs. of ice / day
- Ice storage capacity of 40 lbs
- Measures 19.7" x 17 x 36.7"

KD-50

- Produces up to 50 lbs. of ice / day
- Ice storage capacity of 26.5 lbs
- Measures 15.5" x 17.7" x 36.7"

ALL MODELS FEATURE

- Durable stainless steel exterior
- Easy access front door panel
- An efficient, front-breathing, air-cooled design
- Easy to operate controls
- LED display indicating machine operation status
- Automatic cleaning cycle
- Horizontal evaporator produces individual large cocktail cubes:

KOLD-DRAFT COCKTAIL SERIES

Model	Electrical V/Hz/Ph	Condenser	Ice Production per 24 Hrs lbs (kg)		Energy Input 90°F/70°F kWh/100# (kJ/kg)	Storage Capacity	Water Use gal/100# l/kg (90°F/70°F)		MCA	MOP
