MATCHING & CONTRASTING NAIL COLORS

JULISSA DE MAYO

THE FASHION MAVEN  
EXPLAINS THE SIMPLE USE  
OF THE COLOR WHEEL FOR  
NAIL COLOR SELECTION

\*HYPE NAIL

Finding a correct color combination is one of the most important steps in designing a fashionable look. This is why we're offering you this cheat sheet on the following pages, so you'll always hit the bullseye when using nail colors with each other, shoes, outfits, or simply your mood. Complementary combinations colors are colors that sit opposite of each other on the basic color wheel, sample of which is to the left. The combination of such colors creates a vivid and energizing effect, especially at maximum saturation such as you can get with \*Hype Nail Polishes.

# RULES ?

## NO RULES !

Possibly, if you are a woman in business, you might want a more sophisticated look and choose a single color for all your nails. Spending big dollars at a salon for airbrushing or intricately designed glue-ons may also not project the image you are looking for; but using an accent color on one nail of each hand, and proper colors, can relay an air of confidence,

thereby communicating trust in those you deal with.

With fast-drying \*Hype polishes it becomes easy enough to quickly change to those vivid hues that can make your evening out dancing a complete success.

Whether you are trying to match an outfit, shoes or just complementing other polish colors, the colors you choose says a lot. If your budget is unlimited you can go to the salon every week and let them do the makeover, otherwise staying home in front of the TV while doing your own nails is the best way to go.

# cheat sheet of color combinations.
