

## DRAMJET

Whisky Fortified BA Imperial Stout • 17.6% ABV • 500ml

Bottle Release: July 2018 [Still]

### STORY

Dramjet is unique. There is no other quite like it. It's not really beer, it's not really whisky. Then what is it? We love doing collaborations with our good friends at STARWARD, and this one is extra special. A number of years ago, STARWARD had played around with a strong porter and fortified it with their whisky. The batch was tiny, but extraordinarily delicious. We agreed to collaborate to create a more sizeable volume and rather than a porter, we decided to fortify RAMJET! Into each 100L STARWARD whisky cask, we put 15L of cask strength whisky, topped up the rest with Ramjet and aged it a few months in barrel before packaging. It is intentionally still, meant to be enjoyed like a fine port.

### TASTING NOTES

The whisky and ramjet have melded to become something quite glorious. It is delicious and moreish, with a sweet malty mid palate and a dryish finish from the hops. But please remember, this is not a beer. Due to its high alcohol content, you don't need to finish it in one night—put a cork in it and drink it over a few.

### FOOD PAIRING

Pour over ice-cream for a truly decadent float, or serve with a wedge of English stilton.

### CELLARING POTENTIAL

Who knows? But our best guess is, "a very, very long time!" As this beer has been fortified, it will extend ageing for many years. Ten? Maybe twenty? Either way, you'll probably have consumed it by then!
