

## Charging your JUNO Mirror

JUNO Mirror charges by microUSB cable (just like how you would charge your smartphone). Simply plug in and charge -- the charging port can be found on the right side of the JUNO Mirror.

## What Your JUNO Mirror Comes With

- 1 x JUNO Mirror (mirror, pole, base)
- 1 x Magnifying mirror (5x or 10x)

## Care and Maintenance

**Do not** expose JUNO Mirror to extended periods under direct sunlight.

**Do not** expose JUNO Mirror to extended periods of high heat or extreme humidity.

Gently wipe down mirror to keep clean.

Please contact [juno@thejunoco.com](mailto:juno@thejunoco.com) with any inquiries.

## How to use the JUNO Mirror APP:

Tap the face to turn the mirror on/off.

Drag button to adjust mirror brightness.

Press this button to browse smart light settings.

Tap to open pre-set smart light functions.

Tap to start auto-sensing function.

Tap here to start auto-sensing function. You can save your light with a custom name when finished.

To edit or delete your custom lights, just press and hold.

Hello, gorgeous!

Congrats on getting your JUNO Mirror. We're so excited to have you join the JUNO Community! We're sharing this guide so you can make the most of your JUNO & Co. experience.

Our mission is to create cutting-edge beauty products that will feed your makeup addiction at just a fraction of the cost. We're bringing you beauty without the BS by cutting out the middleman so that we can offer you unbeatable prices. Don't forget to discover our JUNO Microfiber Sponge and our extra luxurious JUNO & Co. Makeup Brushes. Both total beauty blogger favorites. Just head to our website at <http://thejuno.co>

Your support has made our day. We hope your new package brightens yours!

Shine on,

The JUNO Team

## 1. Put your JUNO Mirror together!

Your JUNO Mirror comes with three key pieces: the base, pole, and the JUNO Mirror.

- Using the pole, attach the pole to the base and gently twist it to the right (clockwise) until it clicks.
- Attach the JUNO Mirror to the top of the pole, and gently twist it to the left (counter-clockwise) to make sure it's secure.
- Tilt your JUNO Mirror to capture your favorite angle

## 2. Now that you have your JUNO Mirror set up, let's get started with what you can do!

All the controls you need can be found on the right side of your mirror.

-  - The top button allows you to adjust your makeup light settings between **daylight**, **evening**, and **indoor** settings.
-  - The middle button controls the JUNO ring light which provides a studio-quality glow for selfies and livestreams.
-  - The bottom button turns on your reading light. Tap through to change brightness. **\*Pro tip:** Tilt your JUNO Mirror so the mirror is facing upward to transform your favorite makeup mirror into your favorite desk lamp.
-  - There is a manual power button on the side of your mirror which will turn all blue-tooth and lighting on and off. The default light used will be the daylight setting.
-  - **Purple Light:** power on; **Green Light:** charging; **Blue Light:** fully charged.

## Storing your JUNO Mirror

1. Take the JUNO Mirror apart by unlocking the pole from the base and mirror
2. Gently twist pole at the bottom to the left (counterclockwise) to unlock from base
3. Gently remove base from pole
4. Gently twist pole at the bottom to the right (clockwise) to unlock from mirror **\*Pro tip:** Angle your JUNO Mirror so that it's completely flat for a more seamless experience
5. Gently remove pole from mirror

That's it! For easy storage, lock JUNO Mirror onto base **Warning:** Make sure to do so GENTLY (don't press down too firmly!) to prevent breakage

## Using your magnifying mirror

1. Affix magnifying mirror gently to the center of your mirror (don't press down too hard -- especially if you're using the 5x magnifying mirror with JUNO's extra-strong nano-adhesive backing!)
2. Remove magnifying mirror by gently twisting to the left (counterclockwise); if using 5x mirror with JUNO's nano-adhesive baking, make sure **NOT** to leave on for too long

**\*Pro-tip:** If you have a hard time removing your magnification mirror, use a slim card like a credit or business card to loosen adhering. Or, place the magnification mirror only on one half of the mirror, rather than the center.
