

## Use of flap

1. Attach the flap from the magnet on the front and fold it backwards and away from the front of the bag. Attach it to the back of the bag by clicking the push button on the flap on to the button on the back of the bag.

## Technical data

Material: 100% polyester  
Width: 380 mm  
Depth: 160 mm  
Height: 350 mm  
Weight: 350 g  
Load capacity: 5 kg

## Maintenance

Can be wiped clean with a wet cloth. If necessary, it can also be washed by hand by max 30 degrees celsius.

We recommend that you impregnate your new bag before use. We recommend impregnation 2-3 times a year depending on the weather and general use. If you are often out in rainy weather we recommend every third month. You can use regular impregnation for leather or textile or nano-impregnation.

NB: Be aware that impregnation can result in a darker tone of the textile. Shake the impregnation spray well before use and spray approx. 20 cm from the textile. Multiple thin layers are better than one thick layer to avoid stripes or discoloration

# Use of the weekend bag

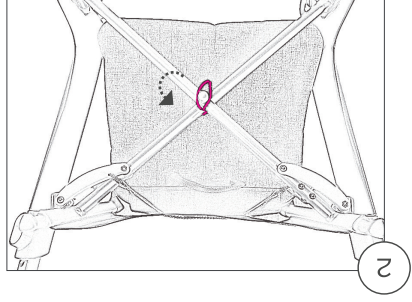

The weekend bag is perfect for every type of adventure. It is spacious and can easily carry what you need for a weekend away or a small trip to the city. The bag can be closed with both a zipper and a flap. The flap can easily be folded and clicked onto the button on the back of the bag in cases where you do not need it.

- Remember to zip the bag before walking to avoid losing any items on your way. This also keeps the content of the bag dry in case of rain.
- Do not overload the bag (5 kg) or fill it more than it can still be closed.

## Attachment

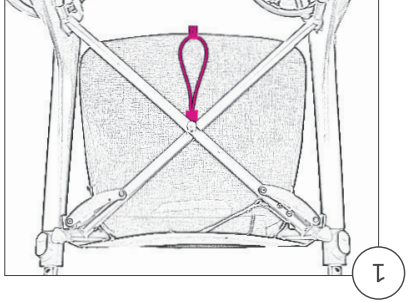

1. Attach the weekend bag by placing the two flat loops in the top corners of the bag around the end pieces of the seat bars. Ensure that the side with the flap on it is facing outwards and away from the seat.

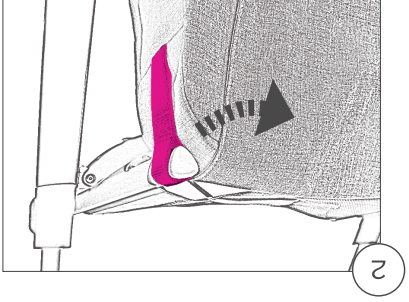

2. Lead the small elastic loop on the back of the bag around the center of the aluminum cross and attach the end of the elastic loop around the small plastic cap of the cross on the side of the rollator facing the back of the bag.

## Detachment

1. Detach the small elastic loop from the plastic cap on the cross.

2. Detach the two flat loops from the attachment points on the rollator.
