

## COMPACT 200

### An actual unwinder-carrying case!

It has **all the advantages:**

- **as stable as a single-piece unwinder**, thanks to 2 connecting bars and anti-skid bases
- **and yet it requires the least amount of space in its class:** once folded, it becomes a 45 cm x 22 cm carrying case
- **tough** (it can carry 200 kg), **yet lightweight** (only 5.9 kg)
- **resistant**, thanks to its complete galvanised finish
- **fixed parts:** the connecting bars are attached to the shoes, the rollers are sliding ones
- **adjustable in width**, by widening the 2 shoes
- for cable drums with diameters between 200 and 700 mm, max width: 580 mm

Patented model

REF: 100-1-20

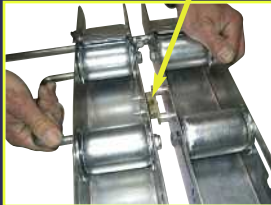

Adjustable in diameter,  
in a single step

### Folds and unfolds in just 3 clicks and 6 seconds!

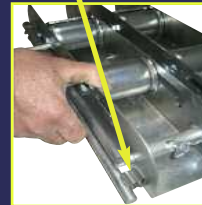

Tighten the shoes again

Lock the shoes

Fold the 1<sup>st</sup> bar again

Fold the 2<sup>nd</sup> bar again

Handle it like  
a carrying case
