

## WO035 - Zombie Rot

### Directions

Empty Zombie Rot into a small cup or dish. Add hot water and mix to desired consistency. An applesauce-like consistency is found to be most widely used for most effects. Test that the Zombie Rot is not too hot for the skin. Apply the material using the wooden stick provided. To create more texture, you may want to “roughen” up the surface as the Zombie Rot begins to dry, by using the wooden stick or Black Stipple Sponge and an up and down “stippling” motion. While the Zombie Rot is still gooey, apply moss in small random patches with fingers and press into place. Once Zombie Rot dries, the moss will remain attached.

### Optional Suggestions

For longer wear, after applying the Zombie Rot to the skin (but before the moss) you may stipple one or two light coats of Cinema Secrets Flesh Latex over the top of the Zombie Rot and lightly onto the skin, directly around the area.

*WARNING: Do Not apply Flesh Latex into Hair as it will NOT come out.*

### Removal

Before removing the Zombie Rot, the excess blood should be wiped off using a paper towel and warm water. Using a small brush or cotton swab, work a small amount of Cinema Secrets Makeup & Adhesive Remover under the edges of the Zombie Rot. Be careful when working around the eyes, to not get any remover or blood in the eyes. Once removed, remove any residual adhesive/makeup, by rubbing more remover into the area. Rinse the skin using a towel and warm water. For additional applications, clean the Zombie Rot with soap and water and a small amount of alcohol. Let dry and store out of the damaging rays of direct sunlight.
