

# Instructions for Use

## Angellift Dermastrips

Revitalize your smile

### STEP 1

Moisturize your face prior to treatment with a deep penetrating moisturizer. Wash lifting strips before each use with anti-plaque mouth wash or soap.

### STEP 2

Choose the area you want to treat (upper or lower mouth) and place one Dermastrip inside your mouth, under the lip, along the gum line, just above the teeth. Initially wear it for only a minute or two to check for discomfort. Once the lift is in place, close your mouth and relax your face. Do not talk, eat or drink while you are wearing your Dermastrips and try not to flex your facial muscles. If irritation occurs, discontinue use.

### STEP 3

Gradually increase your wear time to 30 minutes per day for the first 30 days of treatment (Dermastrips should feel more comfortable with each use).

### STEP 4

If you wish to treat the remaining area (upper or lower mouth), then please repeat the above procedure.

**!** It is **not** recommended that you wear Dermastrips in your upper **and** lower mouth areas at the same time.

### STEP 5

Rinse your Dermastrips with water or mouthwash after every use and store in the accompanying anodized case.

### STEP 6

You should begin to see a reduction of lines and wrinkles within the perioral (around the mouth) region within 30 to 60 days of continued use. As lines fade, reduce wear time to once per week (with a minimum wear time of 30 minutes) to maintain effect.

**i** Dermastrips are a cosmetic treatment for wrinkles around the mouth and lips. Results are based upon a cumulative effect and continued use is recommended for longer lasting and optimum results.

Angellift recommends replacing your Dermastrips every 60 days, as they loose lift due to prolonged use.

## Angellift Derasome

Derasome is only included with an order of Angellift Complete.

Angellift Derasome is an all-natural, heat activated cell growth and moisturizing formula. Derasome works by mixing the active ingredients (white) with the blue botanical extract. This extract carries active salts deep into your skin where they quickly react with your facial muscles to help relax skin tension while providing highly effective, oil free moisturizing.

### STEP 1

To apply Derasome, simply mix 2 or 3 white balls with a little of the blue botanical extract in your hand. Your natural body warmth will help blend and activate the serum.

### STEP 2

Apply all over your face and neck where age lines are present.

**i** Use Derasome morning and/or night alone or under your makeup. For best results you should use it at least once daily.

A 30g jar of Derasome should last approximately 60 days.

Derasome is also the perfect skin hydration companion when used in conjunction with Angellift Dermastrips. Apply Derasome before or while wearing your Dermastrips.

## Angellift Microfibre

Microfibre is included with all orders of Angellift Complete and Angellift Starter.

Microfibre is a cleansing towelette that removes make-up, oil and dirt without alcohol, soaps, or acids. Microfibre removes dead skin cells, cleans your face and helps reduce pore size.

A box of Angellift Microfibre contains 16 compressed sterile tablets, each in its own hermetically sealed pouch.

### STEP 1

To activate your Microfibre towelette, simply place one tablet in a shallow tray with the Angellift wings facing up. Add a small amount of water to the tray slowly. The tablet will rapidly absorb the water.

### STEP 2

Once the Angellift wings disappear, gently shake and unroll the towelette to its full size. Now its ready to gently clean your face.

**i** Angellift Microfibre is a super compact (tablet form is only 1/2 inch diameter x 1/4 inch thick), yet over-sized (expands to 14 x 9 inch when activated), compressed cleansing towelette made from all natural cotton.

Perfect for at home and travel.

## **!** Warning

Angellift products could present a potential choking hazard.

For adult use only, not for children.

Please refrain from use if irritation occurs.
