

Advanced Autosports primarily uses AIM data system. Any data system will give you similar information; we have found AIM to be the most beneficial system on the market. We have developed a package of sensors that we feel works best on a Spec

Miata. And have included all the necessary cables and adapters into our AIM package. It is recommended that you call when ordering AIM data products to get the best possible service. All products are available separately.

Advanced Autosports AIM package:

AIM EVO-4 data system

AIM "G-dash" display unit

AIM oil pressure sender with pigtail and extension cable

AIM water temp sensor and extension cable

AIM custom designed Throttle Position Sensor (TPS) for 1.8 Spec Miatas (will not work with 1.6 electronics)
