Chai Me

The liver is an incredibly hard working organ, acting as a filter for toxins and bacteria in the blood and helps to neutralise and detoxify toxins the body is exposed to from sources such as medications, cigarettes, alcohol, food additives, air pollutants. In order to optimise your health, it is incredibly worthwhile to give your liver a helping hand. When your liver is not functioning properly it can adversely affect the digestive system.

A LIVER CLEANSE CAN HELP:

- Eliminate toxins, such as pesticide residue, medication residue and heavy metals in order to reduce the toxic burden placed on your liver
- Prevent damage to the liver's cells that may arise from toxicity
- Provide the liver with nutrients it needs to cleanse the blood
- Assist in expelling toxic build up in the digestive system

A liver cleanse removes highly processed foods that may be full of hydrogenated oils, refined sugars and food additives that can all place an unnecessary strain on your liver. A juice cleanse ensures that your fluid levels are more than adequate, which improves the flow of nutrients to, and waste products from, the liver.

A Downtown Liver Cleanse is full of vegetables and fruits that contain bioactive vitamins, minerals and phytonutrients that work towards detoxifying and maintaining a healthy liver.

FULL OF LIFE: Our all vegetable green juice, provides active ingredients that work towards neutralising toxins that may be present in our food, as well as stimulating bile production, which is essential for optimal liver health. It is also packed with chlorophyll which assists in blood purification.

GET REDDY: Chock-a-block full of plant flavonoids that can improve overall liver function, as well as naturally cleansing and purifying the blood which further acts to boost liver function.

RISE AND SHINE: Provides plenty of beta-carotene which is essential for healthy liver function. This delicious juice also contains vitamin C, which is a powerful antioxidant that assists in cleansing toxins and aids the digestive process. Whilst the turmeric boosts liver detoxification by assisting enzymes that actively flush out toxins.
