

ETHANOL TREATMENT

SOLVES ETHANOL PROBLEMS

Description

Biochemical fuel improver, which improves the properties of all 2- and 4-stroke fuels (e.g. E10 – E85) blended with ethanol. ETHANOL TREATMENT reduces ethanol and fuel separation, optimises combustion, improves fuel efficiency and reduces corrosion.

Advantages

- Ensures the engine runs more smoothly
- Reduces phase separation
- Removes deposits in the combustion chamber
- Regenerates old fuel
- Assists with the removal of water from the system
- Suitability for use with catalytic converters checked

Application

Shock 10 ml : 10 litres
Prevention 10 ml : 20 litres

Contents

250 ml

It is essential to comply with the vehicle manufacturer's fuel specifications.
