

# SPRAY MOTO PROTECT

## LONG-TERM PROTECTION

### Description

Particularly suitable for protection if the vehicle is idle for fairly long periods. MOTO PROTECT maintains, conserves and protects surfaces from dust and dirt. Moisture is undermined and the treated surfaces are protected against corrosion because of the fine oil film. The product is easy to use because the practical 0.5 litre spray can is also suitable for overhead use.

### Advantages

- Maintenance and protective spray
- Also suitable for overhead use
- For preservation, even if the vehicle is idle for fairly long periods
- Can be used on painted surfaces as well as chromium and other metals
- Excellent protection against corrosion because of a thin oil film
- Protects against dust and dirt

### Application

Apply spray to clean and dry parts and polish with a soft cloth. Do not spray on brake discs. Check material compatibility first by applying to an inconspicuous place. Shake before use.
