

PROTEX SPRAY

Impregnation

Description

Textile and leather impregnation. Highly effective, long-lasting protection against wet conditions and oil. Suitable for leather, textiles and microfibres (e.g. GORE-TEX®); preserves the natural breathability of the fabric. Ideal for shoes, motorbike, ski and cycle clothing, convertible roofs and other sport and leisure items.

Field of application

MOTOREX PROTEX SPRAY is perfect for impregnating shoes as well as motorbike, skiing and cycle clothing, convertible roofs and other sport and leisure items.

Application

Spray material and leave to dry completely. Polish smooth leather or brush rough leather afterwards if necessary. After cleaning the item, repeat the impregnation process. Spray worn areas several times.

Advantages

- water-repelling
- oil-repellent
- breathable
- efficient
- silicon-free

Notes

The material to be sprayed must be clean and dry. Dyed materials must be checked for colour fastness and resistance. Light leather may darken. Do not apply to wood or rubber. Shake before use.

Sizes

500ml

SAP-Nr.	Product name	packaging unit
