#### COLOR MIXING

Your kit includes the three primary colors: red, yellow and blue. With those, you can mix just about anything! Add white to lighten up any color.

## LET'S GET PAINTING!

1

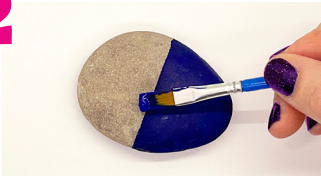

Find or prepare an easy-to-clean work surface. Grab a paper plate or paint mixing palette. Rinse your rock off with water to remove any dust, and let air dry.

5

Once you're happy with the look of your painted rock, let it dry completely again. Select a tattoo from the perforated sheets and peel off its clear protective layer.

2

Paint a base layer - this might be one solid color, or a variety of colors - experiment! Remember, you can always paint over it!

6

Place the tattoo face down on your rock. Get it damp with a sponge or cloth and hold firmly for about 30 seconds.

3

Let your base layer dry completely. You may want to add a second coat. Let each layer dry before adding the next.

7

Gently peel off the backing of the tattoo to reveal your work! Wipe off any excess water and then let dry again.

4

Get creative! You can use the "wrong" end of your brush to add polka dots. Or use painter's tape to achieve straight even lines of color.

8

Apply a generous coat of the liquid resin over top of your tattoo and all over your rock for a clear, and more weather-proof finish.

## COOLNESS & KINDNESS - PASS IT ON!

A simple, straightforward message can go a long way to brighten someone's day.

Your acts of kindness can be as random or as planned out as you'd like. Hide rocks in a park, at the zoo, along a sidewalk or simply hand them to a special person. It's up to you!

We all have superheroes in our lives! Whether it's a teacher, a friend, a first responder or a neighbor. Show them how much you appreciate them.
