Troubleshooting Diagnostic Sheet

KBU28LR BEER AND WINE COMBO

Y/N

Evaporator Fan:

blows air from the cabinet to the evaporator (behind the fan).

Is the LEFT evaporator fan working?

Is the RIGHT evaporator fan working?

Air Outlet:

Evaporator blows cold air to the cabinet.

Is the air (LEFT) cold?

Is the air (RIGHT) cold?

Condenser Fan:

Blows the hot air out from the right of the front grille.

Is there hot air flowing out from the front grille?

Check the door rubber seal by sliding paper in between seal and housing.

(If it was not sealed well, use a hair dryer to blow on it.)
