# 01 INTRODUCTION TO CLAS WELLNESS

CLAS Wellness is the culmination of decades of research and development by an international team of psychologists, photographers, musicians, graphic designers, and sound engineers. The patented CLAS Wellness program synchronizes the therapeutic benefits of color, light, aromatherapy and sound into an immersive experience never previously experienced in the spa industry.

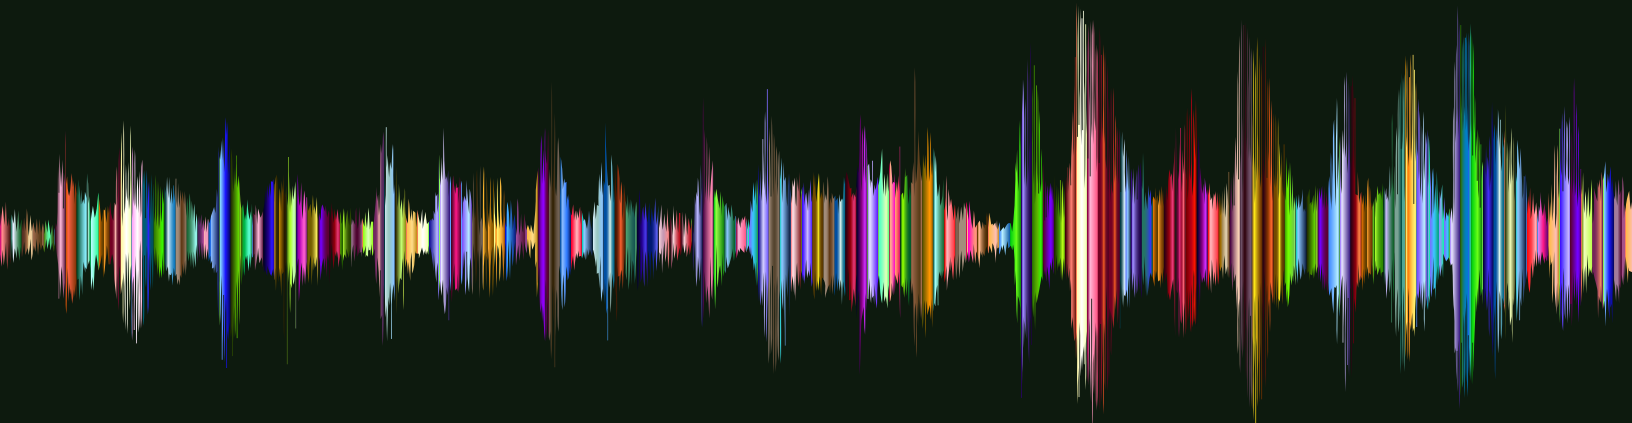

CLAS is cloud-based and is displayed on a large HD TV. Programming is designed by psychologists and color/sound specialists for an ultimate healing and therapeutic experience. Each series of sessions is individually selected for the client's condition, preferences, and needs.

The CLAS Wellness session is enhanced by the unique CLAS ceiling-mounted, color-changing light and speakerless sound system.

CLAS Wellness was developed in cooperation with UK-based ColorDyne Lighting and Bongiovi Acoustics. All elements are synchronized and fill the room with the colors, visuals, sounds and aromas of the session as it progresses, creating a profound immersive experience.

# 02

## THE SESSION ELEMENTS

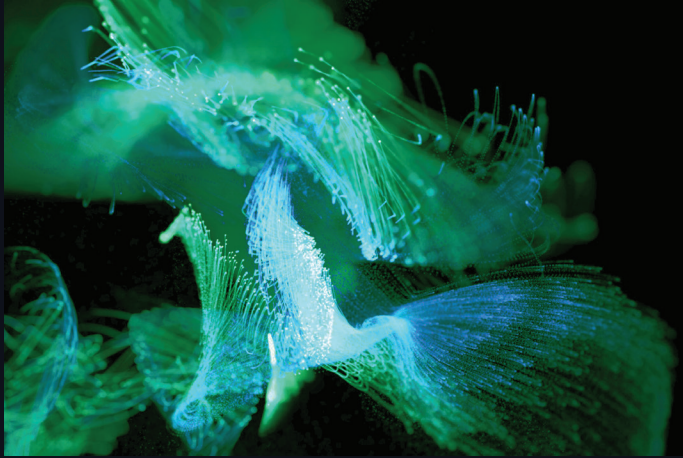

Each session will take the client through a color bath of a hue that directly corresponds to the desired emotional state and then a hypnotic series of visuals that is aimed at easing tension, reducing anxiety and instilling calm.

Clients will experience a custom-designed series of progressive elements that will culminate in a deep meditative state. Mandalas, nature elements and spectacular video footage of natural environments fill the screen while aromatherapy oils that enable the client's desired state of mind are diffused into the air.

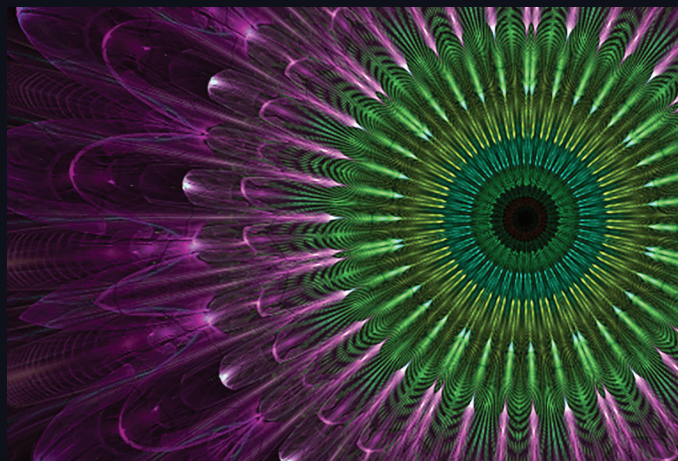

# 4 STEPS TO ABSOLUTE RELAXATION

## NATURAL ELEMENT

One of the five elements (fire, water, earth, metal, wood) will be introduced to the visual display, specifically tailored to the session profile. The imagery will feature outdoor elements, including oceans, rivers, waterfalls, forests, fire, etc., and be accompanied by a correlating sound composition.

## THE PATHWAY

The 25 minute session will end with a pathway experience, bringing all the aspects of the session together in a flowing, relaxing finale. A pathway will emerge and traverse photo-realistic and computer animated imagery that floats, flows and melts into the “road” before reaching a full, floating-in-the-clouds, altered state conclusion.

## GUIDED IMAGERY

Once comfortable and ready to begin the session, binaural sounds will begin as the aroma starts to flow. A large screen in front of the patient will display a mesmerizing series of colors and shapes. The “color bath” will feature hues related to stress reduction, relaxation and introspection. The shapes float across the screen, pulsing in synchronization with the binaural beats and rippling in endless, entrancing visuals.

## MANDALAS

Following the natural elements and aroma, the session will proceed to the mandalas in order to activate a deeper state of relaxation. The colors and shapes of the mandalas are carefully choreographed to correspond with one of the seven chakra colors and accompanied by specifically-composed binaural sound. As the mandalas morph and melt into one another, a kaleidoscopic effect is created on the screen.

# 03 OPPORTUNITIES WITH CLAS

You can now offer your clients an evidence-based relaxation experience like no other with CLAS Wellness.

The program is simple to set up, maintain and incorporate into any spa setting. CLAS Wellness can be offered as a separate service or an addition to other services.

## BENEFITS TO YOUR SPA

- Surveys show that up to 90% of visitors indicate they visit spas to de-stress and relax. CLAS Wellness offers profound relaxation that will generate return visits and referrals.
- Very affordable initial investment
- Selection of subscription options
- No annual contracts
- No technicians or therapists are needed in room once the session starts
- Greatly enhances existing services
- Widens current customer base
- Cloud-based streaming operation with automatic and free updates

The startup package includes components needed to offer CLAS Wellness:

- The CLAS color-changing light and sound system
- Preprogrammed CLAS computer
- CLAS Wellness trolley
- 5 aroma diffusers & 20 essential oils
- Instruction manual and installation guidelines

# 04 CREATE THE ULTIMATE SERENITY ROOM

Multiple options for implementing CLAS Wellness are available to make introducing this proven, effective spa experience possible for every spa. You can equip your CLAS Wellness room with just a few elements, or create a full immersion experience room. Many start-up options are available to suit your space and budget.

Additional options are available such as multi-room use and design customization. Contact us to learn more and offer the new gold standard in stress relief to your clients.

*A zero-gravity bed, aroma diffused into the room, mesmerizing images on a large TV screen, and relaxing music and nature sounds with binaural beats from invisible speakers create an unparalleled spa experience.*

*A sky overhead immediately puts your clients into an expansive state away from modern day stress.*

*A darkened room bathed in healing color and spectacular nature footage wash the world away for a most tranquil state of mind.*

# 05 OUR PARTNERS

## The Delray Center for Healing Delray Beach, Florida

Our association with psychiatrist Dr. Raul Rodriguez and his facility in Delray Beach go back many years, and Dr. Rodriguez is a very valued member of our advisory board.

“I am a Board Certified Psychiatrist and ASAM Certified Addictionologist that works with a high-functioning yet very difficult adult addiction and psychiatric population. I am always looking for that new breakthrough that can change the course of treatment and the lives of those who

can benefit from it. That search brought me to Harmonial Corporation. When I first tried Harmonial’s CLAS Wellness system, I was truly amazed by the intense psychoactive power of the session. I never expected such a rapid and intense effect on my mind. Even my first session had some lasting effects on my sense of well-being. I knew then that CLAS Wellness would become an important facet of my practice. After acquiring my first unit, I was quickly able to incorporate it into my medical practice with almost immediate benefits. The patients noted the most prominent benefits in mood, anxiety levels and sleep. Participating patients did better overall in terms of treatment efficacy and satisfaction. Patients who consistently used CLAS Wellness tended to require significantly less medication. CLAS was an easy fit financially as I was able to generate enough income in the first 2 weeks to cover over 1/3 of the cost of the system. The remaining 2/3 was covered before the unit was 6 months old. The program is refreshingly user-friendly and the equipment has been exceptionally reliable under heavy use. I cannot give anything less than my highest acclaim when it comes to the therapeutic use of CLAS Wellness.”

- Raul. J. Rodriguez, M.D., Ph.D.

## DPS Technology

**Bongiovi Labs** - Tony Bongiovi and his team started out in the recording industry, working with artists such as Jimi Hendrix, The Supremes, Eric Clapton, and the Rolling Stones. The applications of their cutting edge technology grew to include use in airplanes, yachts, personal listening devices and medical applications requiring the most sensitive and accurate reproduction of sound.

CLAS Wellness is proud to count Bongiovi sound as an integral component of our system. **Bongiovi Labs** creates the most advanced sound technology available. The transducers hidden in the walls of CLAS Wellness spa rooms deliver crisp binaural beats, rich music, and nature sounds that make you feel like you are right there by that mountain stream or ocean surf.

# 05 OUR PARTNERS

“We are only beginning to understand what light has to offer in terms of physical, psychological, cognitive and spiritual development. The use of light as a therapeutic tool is a rapidly developing field, with applications that include optometry, stress reduction and the healing of scars. Much research is being done into the various benefits light has to offer.”

- Thelma van der Werff, President, ILA

ILA and CLAS share the mission to make the powerful and effective tool of color and light available to people who want to have insight into themselves and others, and for those who want to use the psychology of color and light to change behaviour, negative thought patterns and create harmony, synergy and balance in their lives.

## Tillberg Design

US Division

**Debra Breslauer** is Tillberg’s VP of Design and Senior Designer for the US division based in Miami, Florida, and has been designing luxury cruise ship environments for over 30 years. She also honors the CLAS advisory board, and is instrumental in designing CLAS spa environments and equipment.

## 06 TESTIMONIALS

*"I was stressed from air travel and nervous...I experienced the CLAS Wellness session after traveling across the country for business meetings with a prospective employer. Stressed from air travel and nervous about my meetings, I entered the session out of balance. After my treatment, I was focused and had a productive meeting with my business associates."*

- SB, Miami

*"As a day spa owner for over twenty years, I was always looking for the ultimate in relaxation and stress relief for our clients. CLAS Wellness more than fulfilled that wish and has become an essential part of our business."*

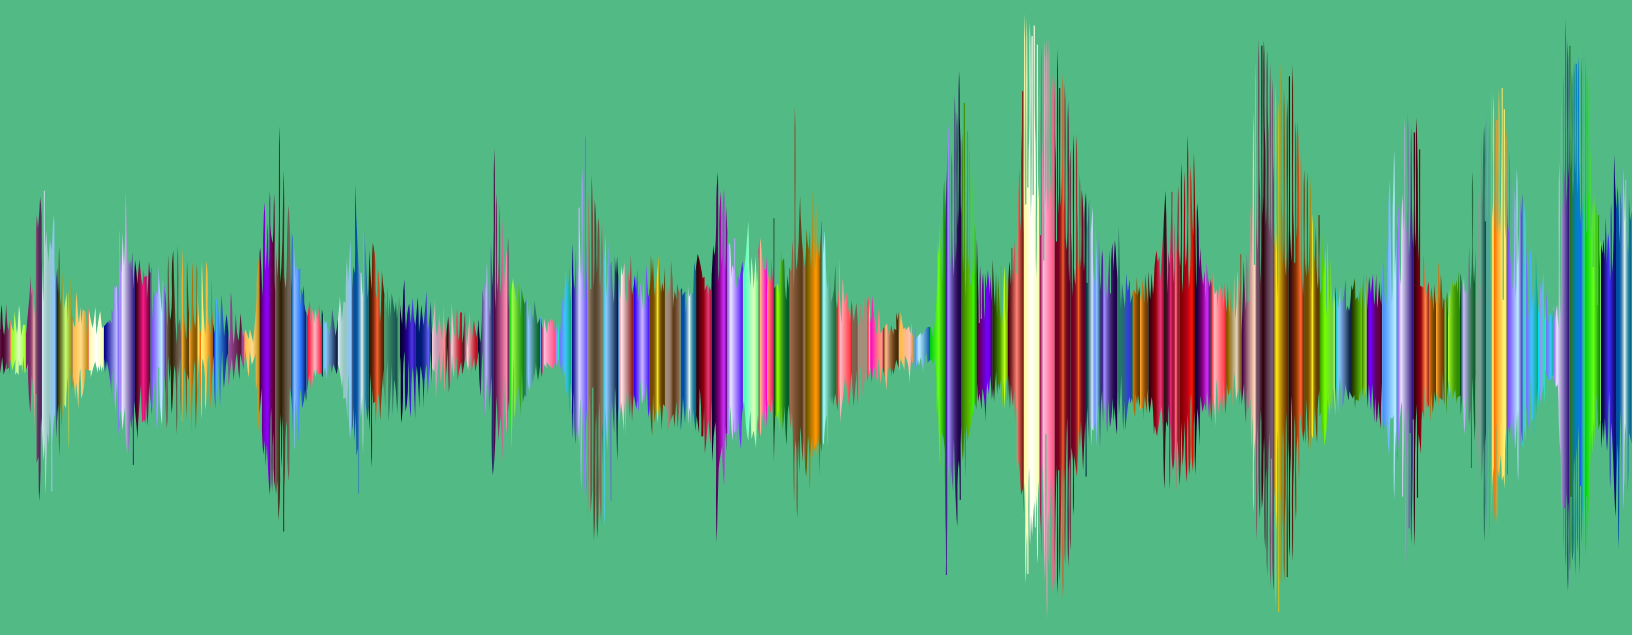

- VT, Spa Owner, Jacksonville, Florida

*"The CLAS Wellness Program has been a great investment in my spa. I use it separately or incorporate it with massage therapy and body wraps for the client's ultimate tranquility. It has upgraded our spa services, giving clients an innovative treatment through technology."*

- MS, Wyoming

CLAS Wellness™ is patented and an exclusive property of Harmonial Corporation.
