

SAUNA

TouchAmerica has curated a selection of Sauna elements designed to elevate and simplify the construction modern saunas under 1200 cubic feet.

Our custom saunas have five essential components

- Sauna Heaters
- Surfaces (Wall, Ceiling, Floor)
- Benches, Seating
- Sound and Lighting
- Entry Door

When designing your sauna with Touch America, start with a footprint layout and measurements.

If you have particular notes or preferences in mind, please include them on the floor plan. If you don't have drawings, we'll need pictures and dimensions for each wall and overhead dimensions.

Next, we'll, determine the footprint and cubic feet of your space. At this point, we can select a appropriately sized heater while keeping-in-mind space requirements and desired accessories.

Choose seating that complements your design, intended use and functionality, benches can be better for ammenity spaces while-reclined seating options can provide more comfort for timed services.

If you would like to incorporate steam, you'll want to go with a HUUM Heater. Saunum stoves are known for air circulation ensuring even heat distribution.

Complete your sauna design by exploring our door options, sound systems, and lighting elements.

- Reach out to us for guidance and support -

Share your floor plan with us at sales@touchamerica.com
And schedule a convenient time for a detailed project review over screen share.

SAUNUM Heaters utilizes the same Air Mixing Technology used in the Air Solo – Saunum patented Air blending system mixes cold oxygen-rich air from the floor with hot, oxygen-poor air off the ceiling to solve the discomfort so many associate with sauna. Whether you like it extremely hot, or just warm, Saunum delivers both in a way that heat and oxygen are felt head to toe.

- European Design – With an elegant black steel finish, Saunum combines Scandinavian design and quality materials.
- Massive Stone Capacity – Stones are the heart of a Nordic sauna. Ample stones result in softer, more even heat, and can produce more luxurious steam. Large 154-pound stone capacity (required 5 boxes sold separately)
- Himalayan Salt Reservoir – Saunum's Himalayan salt tray is positioned within the air stream so that salt ions are propelled throughout the sauna to deliver health benefits more effectively.

Slatted & Embodied Seating Options

Slatted Sauna Bench

These sleek minimalist designs provide style, ventilation, and comfort. We've created a unique design connecting the slats with a durable webbing which clips into place. Unclip for easy access behind bench. Practical and stylish, 1x1 slats offer a modern seating solution.

Carved Solid Surface

Carved solid surface is a sophisticated and versatile material that combines durability and the intricacy of carved design.

This innovative material opens up a realm of design possibilities for both residential and commercial spaces, offering a unique blend of aesthetic appeal and practicality.

Steps to incorporate into your project

Standard or custom?

- 1 These surfaces are available in a number of finishes, and chances are one of our designs will speak to your project.

Still want something off-menu? We shine at customized designs - work off your brief or create something that works for your needs.

Project requirements

We just need the basics to start: dimensions, standard or custom design (all standards cost the same), color material if not white, and whether you envision it backlit (or any other of our systems).

Get a quote

- 3 Based on what you've told us, along with any considerations or questions we have. We might ask if there is any wiggle room in your dimensions, if we think it will make more efficient use of material reducing the cost of your project.

Shop Drawing

- 4 It lays out how the design will look within your dimensions, along with any cutouts or other considerations. A great time to discuss adjustments or ideas before production.

Production

- 5 After receiving the starting deposit and a delivery window, we create the Production File and mill the puzzle pieces so they will fit together perfectly with inconspicuous seams.

Valence Lighting

Illuminate your sauna with the valance sauna light fixture. This sauna lighting system includes a 2" x 6" Western Red Cedar board and a LED light system recessed-mounted to the back of it.

Each light illuminates locations such as benching, walkways, corners, and niches for safety, convenience, and visual style. It also highlights various effects within its radius such as swirling mist, shimmering water, falling droplets, or rushing falls. Consequently, the more lights installed, the greater the impact on the bathing environment.

Recessed - Puck Lighting

These water-safe lighting system features four digitally controlled LED lights that can be located in any shower, steam bath, or bathing space. Their low-profile, flush-mounted design enables them to be installed in convenient space-defining locations, while providing the ideal amount of lighting for superior bathing ambiance.

What are delivery hours?

Comments:

FREIGHT

The weight or packaging of this product requires delivery by special appointment, and on a wooden pallet.

The driver is responsible for curbside delivery "only" and will lower the items to ground level.

Prior to shipping this product, we contact customers to share shipment details and discuss any extenuating delivery circumstances that may complicate or cause additional delivery expenses.

Our goal is to ensure your project's success.

INSTALLATION

After an initial 50% deposit has been provided Touch America will provide rough-in drawings which include wall / ceiling surfaces, benches/ seating, stove placement, lighting, sound equipment and instructions for all electrical components. Distributors are required to submit a PO before Touch America can create drawings.

Benches: Arrive KD but cut to your project requirements. Customer will be provided a choice to have us leave boards long, to be trim onsite, or have us cut to the drawing specs.

Wall Surfaces: Arrive KD. Customer will be provided a choice to have us leave boards long, to be trim onsite, or have us cut to the drawing specs.

Stoves/ Heaters: Some Assemble required. An electrical in needed to hard wire unit in place.

Framing: Touch America is not responsible for any framing. Touch America provides the components specified for the interior.

Entry Door: Touch America's options come with a frame and are ready to hang. Ensure your rough opening is correct for your door ordered.

Sound & Lighting: Follow the manufacturers installation instructions. Plan to have your electrical pull the appropriate wire for your circuits.

TOUCH AMERICA ONLY PROVIDES SAUNA KITS. ASSEMBLY REQUIRED

(50% Before Drawings, Remaining 50% Due Before Shipping)

Each Sauna installation is unique and customized to fit individual needs. Because this is a custom installation and most of the components involved are custom-fabricated to fit the application (nonrefundable, not subject to cancellation), it is important to understand the following document.

These terms and conditions of sale apply to and are part of the sales order or invoice, herein referred to as the "contract," provided by Touch America, which is agreed to and accepted by the customer.

Scope of Work: Touch America agrees to provide the products and/or services described below to the premises of the customer identified as "Ship To" in the contract.

Price and Payment Terms: The customer agrees to pay Touch America the amount set forth in the sales order. The products that are the subject of the agreement are to be custom manufactured to the customer's specifications and cannot be easily resold; therefore, once you have signed this agreement or submitted payment, the products included in the agreement are nonrefundable and not subject to cancellation or change.

Substitutions: Touch America may request to substitute material, components or other products listed in originally specified item becomes unavailable or impractical to procure. The proposed substitute shall be of similar quality and value.

Product and Design: The customer affirms having had ample opportunity to examine and confirm all dimensions provided by the customer to Touch America used to create and produce products described in the sales order. It is the customer's responsibility to inspect all designs, drawings and products immediately upon delivery; notify Touch America within 14 business days of any design errors and defective or noncomplying materials; and fully specify any and all defects or discrepancies in writing. If Touch America is not notified, all such materials shall be deemed to be satisfactory and shall constitute final and irrevocable acceptance of the goods in compliance with this sales order.

Delivery: Himalayan Source agrees to select a freight carrier and transport goods to the "Ship To" address on the contract. Unless special delivery methods are included in the contract, the customer is responsible for managing all product movement from the tailgate of the delivery truck to the site of installation. Any visible damage to shipping cartons or products received must be noted on the bill of lading before accepting delivery. Once the customer accepts the delivery, Touch America is not responsible for damages to products listed in the contract. If the customer chooses, they can select their own delivery method and manage the delivery. In this case, once the products are placed on board the delivery truck, the customer has full responsibility for all freight damage and loss.
