

Locket Guide

Use this guide to fit your meaningful photo or other sentimental items in your Satya Jewelry locket.

*To ensure this guide is printed to scale, begin by laying a credit card on the line. If it fits, you're ready to cut out your templates.

LOCKET PHOTOS

Get Started

1. Print this guide at 100% scale. This will ensure the template will fit your locket correctly.
2. Match the shape of the template to the shape of your locket and cut the template accordingly.
3. Place the template over the photo you want to put in your locket and trace it with a pencil. (Hint: Use matte photos for best results.)
4. Once traced, cut your photo on the inner edge of the outline. If you can still see pencil marks, gently erase them.
5. To secure the image add a small dab of glue and use tweezers to position the photo into the locket, gently tucking the edges in to ensure the photo stays in place. (Please note: Once you add glue the locket is nonrefundable)
6. You're now ready to wear your Satya Jewelry locket close your heart!

No Photos? No Problem.

If you don't have a photo that will fit in your locket, consider adding something else that inspires your journey. A mantra, an intention, or even a tiny poem can be written and cut to fit your locket.
