A Letter From The Owner ... And Thank You!

Thank you so much for your purchase! Please read every word of this short PDF, because it will help you get incredible results from using this product - plus you will learn our exact recommendations for the best way to use your Benson's Best Omega-3 Fish Oil For Dogs!

You might wonder ...

Why Benson's Best?

In 2014, annoyed with the high price of Omega-3 fish oil capsules at the vet's office, and inspired by the lack of high quality, natural treats and supplements for cats and dogs, Benson's Best began manufacturing Premium Omega-3 Fish Oil Softgels for Pets. Our desire was to bring exceptional quality, natural products to pet owners, in order to optimize the health and happiness of the furry, four-legged members of their family.... and that's why I wrote this guide.

In this PDF, you will learn how to best use this product, the reason we feel this is the best fish oil for dogs on the market, and all the incredible benefits it provides..... so that you will LOVE giving this to your dog every day!

Connect With Us

Why You're Going to Love Your Benson's Best Omega-3 Fish Oil For Dogs!

You've made a smart choice, and here's why.

You ordered this because you wanted the best quality omega-3 fish oil for your dog ... that is easy to feed ... that is not messy, like liquid fish oil ... that increases your dog's health and happiness ... and that's exactly what it's going to do. How do we know that?

Because at Benson's Best, we use only the best quality fish oil in our omega-3 softgel capsules.

Our fish oil comes from deep sea anchovies, which are wild caught in the cold, clean waters of Iceland. It is 100% natural, safe, and refined for human consumption ... so you can even take it, if you like! Our fish oil is non-GMO, it does not contain any mercury, PCBs, heavy metals, pesticides and dioxins. It is even certified for purity and potency by 3rd party labs.

In short, you're going to LOVE the results you see. In fact, why don't I explain ...

Here Are 5 Great Things That Your Benson's Best Omega-3 Fish Oil Will Do For Your Dog!

Very Happy Customer

"Our vet recommended fish oil for our dog's ear allergies. We did some research and decided to try Benson's Best. We have seen a huge improvement in our dog's allergies.! Also started giving it to our other dog for his arthritis. We just throw a capsule in their food morning and night and they just eat it right up! Very happy with this purchase and will definitely be purchasing it again!" - Laura Williams

- 1. Improve the health of your dog's skin and coat and reduce shedding.** Omega-3 can help improve the condition of your dog's fur, transforming a dull or brittle coat into a mane of glossy hair. It even seems to have a positive effect on the amount of fur that is shed, so you'll spend less time cleaning dog hair off of clothing, furniture and floors!
- 2. Relieve arthritis pain and improve mobility, gait and posture.** Our fish oil reduces inflammation and improves joint health, so you no longer have to cringe every time you see your dog struggle to get up. Tests have shown that dogs with osteoarthritis see a remarkable improvement in their gait, posture and activity level after being given food rich in omega-3 fatty acids derived from fish.
- 3. Reduce the symptoms of allergies.** Allergic reactions are the number one skin problem for dogs, and can cause untold discomfort, often resulting in your dog yanking out tufts of hair, or scratching their skin until it bleeds. The omega-3 works to reduce the histamine and its effects, subsequently minimizing allergy symptoms.
- 4. Protect the heart, kidneys and brain.** Many dogs face problems that are linked to inflammatory conditions, such as kidney disease, heart problems, brain disease, bowel disease and colitis. Inflammation is closely linked to the animal's auto-immune system, and receiving omega-3 helps to reduce the auto-immune response.

5. **Boost the immune system.** Omega-3 is also known to help boost the immune systems of dogs, subsequently decreasing the likelihood of them becoming ill. This is especially pertinent with older dogs, who are naturally more prone to succumbing to illness.

Now that you understand the results your dog will experience and the quality of fish oil we are providing ... I bet you'd like to know how to get the best possible results from your Benson's Best Omega-3 Fish Oil ...

How To Get the Best Results When Using Benson's Best Omega-3 Fish Oil For Dogs!

★★★★★ *He was saved from horrible conditions...*

"We adopted a dog from a local rescue. He was saved from horrible conditions that caused him to have patches of fur missing and red irritated skin. We spent a great deal of money at the vet, but only found temporary fixes. He has been on Benson's for almost 2 months now. His hair is coming back in and he is putting on weight. This is wonderful stuff."

- Lisa Pace

Here's how to get the best results using Benson's Best Omega-3 Fish Oil For Dogs...

- 1. For optimal results feed your dog the omega-3 fish oil softgels, on a daily basis, according to the weight chart below:**

Dog Weight	Softgels/Day
10-25 lbs.	1
26-50 lbs.	2
50+ lbs.	3

- 2. Many dogs will take the softgel and eat it as if it is a treat.**

If your dog is reluctant to do so, try wrapping it in a piece of cheese, adding a bit of butter, peanut butter, or putting it in a pill pocket. If your dog is still reluctant to take the capsule, you could try using a pet pill dispenser.

- 3. If your dog has a sensitive tummy, start with one capsule/day and gradually increase the dosage until you reach the daily recommended dosage.**

FAQ's About Benson's Best Omega-3 Fish Oil For Dogs

Q: Why don't you use salmon oil?

A: The fish oil in our soft gels is from deep sea anchovies, which are wild caught in the North Atlantic Ocean surrounding Iceland. We use anchovy oil because it has a higher concentration of omega-3 fatty acids (EPA & DHA) than salmon oil.

Our 1000 mg softgel capsule provides 300 mg of omega-3 fatty acids, while the same size of salmon oil capsule only provides 210 mg of Omega-3 fatty acids. That means that your dog is receiving **43% more essential omega-3 fatty acids** because you chose Benson's Best, rather than salmon oil!

Q: Does this product need to be refrigerated once it's been opened?

A: No, the softgel capsule provides a protective barrier which keeps the fish oil fresh for an extended period of time. You can find the expiration date on the bottom of the bottle. Store the bottle of softgels at or below room temperature, and do not expose it to direct sunlight.

Q: Where is this manufactured?

A: The fish oil is purified, molecularly distilled and manufactured into softgel capsules in Iceland. The softgel capsules are then packaged in the USA.

Q: Does this product contain rosemary oil?

A: No, our fish oil does not contain rosemary oil. Some fish oils contain rosemary oil as a preservative. However, this can upset your dog's tummy, so instead we only use natural tocopherols (vitamin E).

Thanks Again!

Thank you so much for taking the time to read this guide. At Benson's Best, we aim to provide you with an exceptional quality product, and world class customer service. We value our loyal customers, and we love hearing the success stories of using our omega-3 fish oil. We look forward to hearing your dog's success story!
