You might wonder ...

Why Benson's Best?

In 2014, annoyed with the high price of Omega-3 fish oil capsules at the vet's office, and inspired by the lack of high quality, natural treats and supplements for cats and dogs, Benson's Best began manufacturing Premium Omega-3 Fish Oil Softgels for Pets. Our desire was to bring exceptional quality, natural products to pet owners, in order to optimize the health and happiness of the furry, four-legged members of their family.... and that's why I wrote this guide.

In this PDF, you will learn how to best use this product, the reason we feel this is the best fish oil for pets on the market, and all the incredible benefits it provides..... so that you will LOVE giving this to your pet every day!

Why You're Going to Love Your Benson's Best Omega-3 Fish Oil For Cats & Small Dogs!

You've made a smart choice, and here's why.

You ordered this because you wanted the best quality omega-3 fish oil for your pet ... that is easy to feed ... that is not messy, like liquid fish oil ... that increases your pet's health and happiness ... and that's exactly what it's going to do. How do we know that?

Because at Benson's Best, we use only the best quality fish oil in our omega-3 softgel capsules.

Our fish oil comes from deep sea anchovies, which are wild caught in the cold, clean waters of Iceland. It is 100% natural, safe, and refined for human consumption ... so you can even take it, if you like! Our fish oil is non-GMO, it does not contain any mercury, PCBs, heavy metals, pesticides and dioxins. It is even certified for purity and potency by 3rd party labs.

non
GMO

In short, you're going to LOVE the results you see. In fact, why don't I explain ...

Here Are 5 Great Things That Your Benson's Best Omega-3 Fish Oil Will Do For Your Pet!

Great product

"My cat has had dandruff for a while. Even after washing him with pet shampoo, it came back. After about 2 weeks of the fish oil, the dandruff is gone and the quality of his coat looks great. I will definitely keep buying this." - Amazon Customer

1. **Improve the health of your pet's skin and coat and reduces shedding.** Omega-3 can help improve the condition of your pet's fur, transforming a dull or brittle coat into a mane of glossy hair. It even seems to have a positive effect on the amount of fur that is shed, so you'll spend less time cleaning pet hair off of clothing, furniture and floors!
2. **Relieve arthritis pain and improve mobility, gait and posture.** Our fish oil reduces inflammation and improves joint health, so you no longer have to cringe every time you see your pet struggle to get up. Tests have shown that both cats and dogs with osteoarthritis see a remarkable improvement in their gait, posture and activity after being given food rich in omega-3 fatty acids derived from fish.
3. **Reduce the symptoms of allergies.** Allergic reactions are the number one skin problem for both cats and dogs, and can cause untold discomfort, often resulting in your pet yanking our tufts of hair, or scratching their skin until it bleeds. The omega-3 works to reduce the histamine and its effects, subsequently minimizing allergy symptoms.
4. **Protect the heart, kidneys and brain.** Many cats and dogs face problems that are linked to inflammatory conditions, such as kidney disease, heart problems, brain disease, bowel disease, and colitis. Inflammation is closely linked to the animal's auto-immune system, and receiving omega-3 helps to reduce the auto-immune responses.

5. **Boost the immune system.** Omega-3 is also known to help boost the immune systems of cats and dogs, subsequently decreasing the likelihood of them becoming ill. This is especially pertinent with older pets, who are naturally more prone to succumbing to illness.

Now that you understand the results your pet will experience and the quality of fish oil we are providing ... I bet you'd like to know how to get the best possible results from your Benson's Best Omega-3 Fish Oil ...

How To Get the Best Results When Using Benson's Best Omega-3 Fish Oil For Cats & Small Dogs!

★★★★★ *Small fish oil capsules perfect for small pets.*

"Finding Benson's Best Omega-3 Fish Oil capsules was an answer to a prayer. My 12 lb miniature longhaired dachshund has suffered from dry skin since we brought him home from the breeder. Altering his diet helped but summer allergies still brought on itching spells which kept all of up at night and had him scratching himself raw. Being a small dog, other fish oil caps were too large for him to chew. One Benson's cap a day was enough to stop his itching and during a silky gloss back to his fur." - Ginger Peale.

Here's how to get the best results using Benson's Best Omega-3 Fish Oil For Cats & Dogs...

- 1. For optimal results feed your pet the omega-3 fish oil softgels, on a daily basis, according to the weight chart below:**

Pet Weight	Softgels/Day
3-10 lbs.	2
11-25 lbs.	3
25+ lbs.	4

- 2. Many pets will take the softgel and eat it as if it is a treat.**

If your pet is reluctant to do so, try wrapping it in a piece of cheese, adding a bit of butter, peanut butter, or putting it in a pill pocket. One happy Benson's Best customer stated that he moistens the capsule with a little cold water which makes it very slippery, and then he places it on the back of his small dog's tongue, and she swallows it very easily. Another customer has reported that using a pet pill dispenser/syringe works really well with cats.

- 3. If your pet has a sensitive tummy, start with one capsule/day and gradually increase the dosage until you reach the daily recommended dosage.**

FAQ's About Benson's Best Omega-3 Fish Oil For Cats & Small Dogs

Q: Why don't you use salmon oil?

A: The fish oil in our softgels is from deep sea anchovies, which are wild caught in the North Atlantic Ocean surrounding Iceland. We use anchovy oil because it has a higher concentration of Omega-3 fatty acids (EPA & DHA) than salmon oil (43% MORE!).

Q: Does this product need to be refrigerated once it's been opened?

A: No, the softgel capsule provides a protective barrier which keeps the fish oil fresh for an extended period of time. You can find the expiration date on the bottom of the bottle. Store the bottle of softgels at or below room temperature, and do not expose it to direct sunlight.

Q: Where is this manufactured?

A: The fish oil is purified, molecularly distilled and manufactured into softgel capsules in Iceland. The softgel capsules are then packaged in the USA.

Q: Does this product contain rosemary oil?

A: No, our fish oil does not contain rosemary oil. Some fish oils contain rosemary oil as a preservative. However, this can upset your pet's tummy, so instead we only use natural tocopherols (vitamin E).

Thanks Again!

Thank you so much for taking the time to read this guide. At Benson's Best, we aim to provide you with an exceptional quality product, and world class customer service. We value our loyal customers, and we love hearing the success stories of using our omega-3 fish oil. We look forward to hearing your pet's success story!
