Wash hands thoroughly with soap and water after use!

Step by step instructions

For best results, please visit our digital resource center for detailed instructions with repair videos, ebooks and more.

Visit go.coconix.com/leatherrepair or scan the code!

1. Prepare the damaged area by carefully trimming any excess threads, jagged bits or burn marks. If necessary, cut off any charred material. Clean the area with rubbing alcohol and a cotton swab or cotton pad. Before applying the rubbing alcohol, please test it on an inconspicuous area and proceed carefully. Make sure that the damaged area is level with the rest. If needed, refill any missing stuffing material with cotton or similar materials.

2. For rips, cuts and holes larger than 1/4 of an Inch, cut a piece of backing fabric with rounded edges, slightly larger than the damaged area and insert it with the spatula. Do not use the backing fabric for repairs smaller than 1/4 of an Inch or for surface damages such as peeling or scratched areas.

3. In case your leather or vinyl is not a true black, use the mixing jar to add some white compound to the black compound and achieve the correct tone.

4. Apply the repair compound to the damaged area. First, apply it under and along the edges and work from the outside to the center. Use the spatula for larger applications and the brush for surface applications and detail touch ups. Allow several hours to dry until the repair compound is no longer sticky to touch. Apply additional layers until the repaired area is flush with the rest.

5. After the repair compound dries, use a cotton pad or cotton swab with rubbing alcohol to buff out any edges. If the repaired area has a bulge or a bump, use a cotton pad or cotton swab with rubbing alcohol to carefully level the repaired area.

6. If you need help please email support@coconix.com. We have an awesome customer service team who lives and breathes this stuff.

FREQUENTLY ASKED QUESTIONS

The color mixture did not match my repair

We know that color matching can be challenging and our repair experts can help you get a perfect match. Email support@coconix.com with a picture of your repair project and we will give you personalized advice.

I am not sure if I need to use the backing fabric

The backing fabric is used for rips, cuts and holes larger than 1/4 of an inch. Surface damages, such as peeling or scratched areas are not suitable for the backing fabric. For surface damages, apply the repair compound directly. If you need help with your repair, email support@coconix.com with a picture of your repair project and we will give you personalized advice.

I made a mistake and want to start over

You can easily wipe off the repair compound with a wet cloth or sponge. If the repair compound is dry, use rubbing alcohol and a cotton swab or cotton pad to carefully remove the repair compound. Alcohol can damage the finish, so please test it on an inconspicuous area and proceed carefully.

The repair is shiny but I need a matte finish

The correct sheen is almost as important as the correct color. For a matte finish, carefully rub the repaired area with a cotton pad and rubbing alcohol. Before applying the rubbing alcohol, please test on an inconspicuous area and proceed carefully.

Repaired area feels sticky

Drying time of the repair compound depends on the thickness of the layer and the relative humidity of the environment. For best results, apply thin layers and let the repair compound fully dry between each layer. If your repair is still sticky after 2-3 days, carefully rub the repaired area with a cotton pad and high concentration (90+%) rubbing alcohol. Before applying the rubbing alcohol, please test on an inconspicuous area and proceed carefully.

I ran out of repair compound but my repair is not completed

If you need more repair compound to complete your repair, please email support@coconix.com and we will help.

I have another problem

We are a small family business and we pride ourselves on outstanding customer service. We work so hard to make sure that every repair is completed to your satisfaction. If you have any problems with your repair kit, please email support@coconix.com and we'll make it right.

I would like to post a product review

We would love that too! Your review means the world to us. Thank you very much for taking the time. We hope we could make this an excellent experience for you. Go to amazon.com/ryp to post your review.
