

glerups

Our passion is felt

THE GLERUPS STORY

“It started as a hobby at our small farm in Denmark—making practical, comfortable, colourful slippers for family and friends using our own wool. It was a slow, step-by-step process that turned into a passion. We go a bit faster now, but we still put the love, natural comfort and family pride into every Glerups we make.”

—Nanny Glerups, Founder—

YOU’LL WISH YOU COULD WEAR THEM EVERYWHERE.

Once upon a time, the slipper lived under the bed. The “bedroom” slipper was tired and dull or pink and fluffy and didn’t get out much. Then Nanny Glerups had a dream to free the slipper.

“A slipper should be comfortable, natural and fun!”

Glerups feel at home just about anywhere. People take Glerups for overnights. Throw Glerups into a travel bag to slip into at parties. Relax in Glerups on long flights. Get natural in Glerups around the campsite. Your Glerups go where you go.

THE SLIPPER / LEATHER SOLE

Vegetable-tanned leather soles.

GLERUPS BECOME YOU.

Another unique characteristic of Glerups wool is its ability to mold to your feet—another reason to go sockless! Glerups will adjust to your foot shape after just a few uses, making them more comfortable with every wear.

Available in Woman's 5 to Men's 14

THE SHOE / LEATHER SOLE

All styles have 100% pure, natural wool uppers.

GLERUPS REMOVED THE ITCH AND LEFT THE COMFORT.

Glerups unique felting process removes the itch of wool. A mix of Gotland and blended wools naturally combined and steam-felted for a perfect fit. So, go ahead and kick your socks off! 100% pure wool and 100% no itch. Now that's natural comfort!

Available in Woman's 5 to Men's 14

THE BOOT / LEATHER SOLE

Double-layer inner soles in all styles.

WONDERFUL, WEARABLE, SELF-CLEANING WOOL.

Wool fibres wick moisture away from your skin and release it to the air, essentially a self-cleaning process unique to wool. This ensures less perspiration and natural odour-free slippers. That's why we say "Wear your Glerups barefoot for total comfort!"

Available in Woman's 5 to Men's 13

GOTLAND WOOL

We grow our own.

Glerups started with wool from the family's own Gotland sheep. Gotland fleece is renowned for a lustrous, silky fibre rarely equalled. Over the years Glerups perfected the wool mix by blending Gotland wool with carefully selected quality wool from New Zealand farmers. These farmers meet Glerup's high standards for consistent quality and humane animal welfare. Glerups works with these farmers every step of the way and follow each pair of Glerups from their happy sheep to your happy feet.

THE RUBBER SOLE

New natural rubber sole.

BAREFOOT IS BEST.

Wool 'breathes' to keep feet comfortable no matter what the ambient temperature. Wool wicks moisture away from your skin, unlike synthetic man-made materials which impede this process and actually cause feet to sweat.

Rubber Soles available only in Black, Grey and Denim

Available in Woman's 5 to Men's 13

“I just love Glerups so much!! I literally wear them every waking moment. I tell all my friends and when I meet another Glerup lover, we totally bond over it. Thanks again!”

–Alison P. from Calgary–

SIZE CONVERSION CHART.

EURO Glerups	CAN Women	CAN Men	(cm) Foot
35	5		22
36	6		22.5
37	6.5-7		23.5

EASY CARE, EVERYDAY WEAR.

Wool has the natural ability to clean itself and it is highly odour-resistant. If you let your Glerups have some air and the occasional rest (it won't be easy!), they will maintain their original freshness. Should you feel a wash is necessary, please wash by hand in warm, soapy water, using ordinary laundry detergent. Leave them in the water for 15 minutes, gently rub them clean, rinse and air dry or spin-dry without heat. Put your feet into the moist shoes and pat them into shape then remove and allow them to dry naturally.

Note: For a better result, vacuum before washing. Always dry your Glerups at room temperature—never dry with or by a heat source!
