

# Gothic Cross Project INSTRUCTIONS

Before you begin, we recommend watching our YouTube tutorial video which goes over these steps in greater detail:

Search “How to Forge a Gothic Cross” or go to:

<https://www.youtube.com/watch?v=VqJu5BdACbI>

1. Heat and texture the edges on the front side of the larger piece

2. Texture the face and edges on the front side of the smaller piece.

3. Take a square and drawing two perpendicular lines to make sure your cross is still straight.

4. Find the center of each arm in the larger piece and drill holes.

5. These holes can be used to either rivet the pieces together, or plug weld them together (as shown).

**You have finished your custom gothic cross!**  
Mount a hook to display on the wall, or leave as is.

There many styles and designs that can be made from Gothic Cross Projects!
