

8000BU-3900IA

PROFESSIONAL STEAM BOILER W/ HIGH PRESSURE IRONING STEAM WAND

The 8000BU provides continuous steam for an unlimited amount of time when it's hooked up to a direct water line or with the available 2 gallon water container. There's no more down time waiting for the boiler to re-pressurize. Paired with the 3900IA Ironing Steam Wand, it produces dry pressurized steam perfect for a wide variety of materials and applications.

Unlike a conventional steam iron, the 3900IA's unique ergonomic grip/handle can be used comfortably in any position, whether it's vertical like a steamer or horizontal like an iron. The aluminum soleplate provides more heat than our 3800IA brush and allows the user to press "hooks and cranny's" that would be challenging or impossible with a standard steam iron.
