

Which card sets are right for you ...

<p>UAT USA EMV™ Test Card Set</p>	<p>Our newest and most comprehensive EMV test card set for the U.S. market.</p> <p>This card set includes Visa, Mastercard, Amex, Discover, U.S. Debit and Interac Debit cards featuring a variety of Cardholder Verification Methods.</p> <p>The UAT USA card set is intended for customers that require EMV contact, contactless and fallback cards for development, testing, training, or demonstration purposes.</p> <p>Note: This card set is recommended by some processors for User Acceptance Testing.</p>
<p>USA Debit EMV™ Test Card Set</p>	<p>Designed specifically for the U.S. market, this comprehensive EMV Debit card set contains cards personalized to match the many U.S. Common Debit scenarios that must be supported by EMV devices deployed in the USA.</p> <p>The USA Debit Card Set contains both U.S. Debit cards (Discover, DNA, Mastercard and Visa) and Canadian Interac Debit cards. The U.S. Debit cards include both Global AIDs and U.S. Common Debit AIDs, referencing both a Single Funding Account and Multiple Funding Accounts.</p> <p>Four cards are EMV Dual Interface (contact/contactless) cards, and all cards contain a contact EMV chip and a magstripe.</p> <p><u>Note: This card set includes a comprehensive U.S. Debit Test Plan with over 150 test cases to help you understand and test the many U.S. Debit scenarios that should be supported by EMV solutions deployed in the USA. Please note that this debit test plan is for development and testing purposes, your acquirer may have a separate debit test plan that must be used during certification.</u></p>
<p>UAT Canada EMV™ Test Card Set</p>	<p>Our newest and most comprehensive EMV test card set for the Canadian market.</p> <p>This card set includes Visa, Mastercard, Amex, Discover and Interac Debit cards featuring a variety of Cardholder Verification Methods.</p> <p>The UAT Canada card set is intended for customers that are deploying solutions in Canada or want to ensure their system can process Canadian EMV cards, and require EMV contact, contactless and fallback cards for development, testing, training, or demonstration purposes.</p>
<p>UAT UK EMV™ Test Card Set</p>	<p>Designed specifically for the U.K. market this EMV card set is ideally suited for performing User Acceptance Testing, training and demonstrations.</p> <p>This card set consists of Amex, Diners, Discover, Mastercard and Visa cards with primarily U.K. Country and Currency Codes.</p> <p>All cards are English language and contain a contact EMV chip and a magstripe. Some cards also include a EMV contactless interface.</p>
<p>UAT Europe EMV™ Test Card Set</p>	<p>Designed specifically for the European market this EMV card set is ideally suited for performing User Acceptance Testing, training and demonstrations.</p> <p>This card set consists of Amex, Diners, Discover, Mastercard and Visa cards with a variety of Country Codes, Currency Codes and languages.</p> <p>All cards contain a contact EMV chip and a magstripe. Some cards also include a EMV contactless interface.</p>
<p>UAT ATM EMV™ Test Card Set</p>	<p>Designed specifically for use by companies in the ATM market.</p> <p>The UAT ATM card set includes credit and debit cards supported by ATMs such as Visa Interlink, Visa Plus, Mastercard Cirrus, Interac and a variety of other Visa, Mastercard, Amex, Discover and DNA cards.</p> <p>All cards contain a contact EMV chip and a magstripe. These cards are contact only and do <u>not</u> have a contactless interface.</p>

Test Card Sets

Mastercard BIN2 EMV™ Test Card Set	<p>This card set contains two Mastercard BIN '2' EMV cards that can be used to ensure your POS solution supports the new Mastercard '2xxxxx' BIN range.</p> <p>The set contains both a contact and a contactless EMV test card. Both cards contain a magstripe for fallback processing.</p>
UAT Flash EMV™ Test Card Set	<p>This Interac Flash card set is useful to companies developing EMV applications for the Canadian market.</p> <p>The card set consists of one English and one French Interac Flash dual interface card. It is intended for customers that wish to ensure that their EMV solution supports contactless Interact Flash EMV debit cards.</p>
Interac USA Interop EMV™ Test Card Set	<p>Designed specifically for the US market, this 3-card set contains cards personalized to match the various configurations of Interac cards issued in Canada. Two of the cards include the Interac application as well as a global payment brand (aka co-badged debit and credit cards).</p> <p>The U.S. payment industry is attempting to provide guidance to U.S. merchants to help prevent transaction processing issues related to incorrect AID selection for Canadian issued cards, causing interoperability issues resulting in a poor cardholder experience.</p> <p>Using the Interac USA Interop EMV Test Card Set you can test your EMV solution to ensure it processes Canadian issues cards properly before it is deployed.</p> <p>The set is relevant to merchants who support Interac as well as merchants who do not and want to ensure their EMV solution correctly selects the global payment brand application.</p>
JCB Acquirer Dual Interface EMV™ Test Card Set	<p>This card set is intended for customers that have added JCB card support (contact and contactless) to their EMV POS solution.</p> <p>The card set consists of three JCB Dual Interface test cards and one magstripe only (fallback) card.</p>
UnionPay EMV™ Test Card Set	<p>This card set is intended for customers that have added China UnionPay card support to their EMV POS solution.</p> <p>The card set consists of four UnionPay EMV contact only test cards. Two credit cards, one debit card and one combination credit/debit (U.S. Only) card.</p>
UnionPay QuickPass EMV™ Test Card Set	<p>This card set is intended for customers that have added China UnionPay (contact and contactless) card support to their POS solution.</p> <p>The card set consists of eight UnionPay Dual Interface test cards. It includes Debit and Credit cards with currencies including CNY and USD. All cards have an issuer country of CHN and language of Chinese.</p>
B2 USA EMV™ Test Card Set	<p>Our original EMV contact card set developed specifically for the U.S. market.</p> <p>This card set includes Visa, Mastercard and Interac cards. All cards have a chip and include a magstripe for fallback processing.</p> <p>This card set includes English, French and Spanish cards and cards with non-USD Currency Codes.</p> <p><u>Note: This is a legacy card set that is being replaced by the UAT USA EMV Test Card Set which includes a more comprehensive mix of EMV contact/contactless, credit/debit cards and additional card brands. Please review the UAT USA EMV Test Card Set description to see if it better suits your needs before ordering the B2 USA EMV Test Card Set.</u></p>

Test Card Sets

<p>B2 USA Supplementary EMV™ Test Card Set</p>	<p>An extension to the B2 USA EMV Test Card Set that includes EMV contact/contactless Amex and Discover cards. All cards contain a magstripe for fallback processing.</p> <p>This card set is intended for customers who have purchased the B2 USA EMV Test Card Set in the past and wish to extend their existing EMV card set(s) to include Amex and Discover cards.</p>
<p>B2 USA Debit EMV™ Test Card Set</p>	<p>An introductory U.S. Debit card set that is an extension to the B2 USA EMV Test Card Set. The set includes EMV contact Visa, Mastercard and Debit Network Alliance EMV U.S. Debit cards.</p> <p>This is a limited set of U.S. Common Debit cards intended for customers who have previously purchased the B2 USA EMV Test Card Set and wish to extend their existing EMV card set(s) to include a few basic EMV U.S. Debit cards. This set does <u>not</u> support many of the U.S. Common Debit card scenarios that debit EMV POS Solutions deployed in the USA should support.</p> <p>The Visa and Mastercard cards each contain two AIDs linked to a single funding account (a U.S. Common Debit AID and a Global Debit AID).</p> <p><u>Note: For more comprehensive U.S. Common Debit testing, the USA Debit EMV Test Card Set is a better choice as it contains cards personalized to match many of the more complex U.S. Common Debit scenarios that must be supported by devices deployed in the U.S. marketplace.</u></p>

B2 EMV test cards are intended for development, testing, training and demonstration purposes when attached to a development host.

The B2 card sets are not suitable for full card brand certification, nor are they intended for use when connected to a live production host.
