SCALPAREHAB

*Ultimate Post-Care Relief
For Aesthetic Procedures*

Scalpa specializes in aesthetic procedures which is why we saw the importance of creating the best aftercare product for your procedures.

We have done this through a variety of powerful natural ingredients such as triglycerides and wax esters in an olive oil base, to make for the ultimate moisturization. The emollients help to draw moisture from the air, enhancing the humectant process.

Not only does this product assist in the aftercare of aesthetic procedures, it is especially beneficial in tattoo and permanent makeup applications as it also supports the color to last longer in your follicle impressions, promoting the longevity of the procedure.

Rehab was specifically formulated with ingredients to promote and protect your procedures. It has the added benefit of vitamins and plant based ingredients to encourage the natural healing process, while also retaining moisture and forming a protective barrier over your new procedure.

Rehab also has better consistency than other brands, making the application smoother and more effective.
