Why You Should Get this UV DTF Printer

Boost Customer Base and Sales:

Owning a UV DTF printer opens up opportunities to attract more customers by offering a diverse range of customized products. By being able to print and customize items yourself, you can increase sales and satisfaction among your clientele.

Empower Your Customization:

With the Aries 113, you have the power to customize and print a wide range of items in-house. Take control of your production, allowing for greater flexibility in meeting customer demands and expanding your product offerings.

Outsource Less, Achieve More:

The self-contained nature of the UV DTF printer means you can minimize outsourcing, saving you costs and providing quicker turnaround times, giving you a competitive edge in the market.

Quality and Support: With high-quality printing capabilities and the backing of Lawson Screen & Digital Product's US-based support and service, you can trust in the reliability and performance of this printer.

Game-Changing UV-DTF

Technology: Embrace the future of promotion, sign-making, and personalized products with UV-DTF technology. This innovation is poised to revolutionize the ASI/personalization industry, making the Aries 113 a forward-looking investment.

High Speed, 2-in-1 Functionality:

The Aries 113 is a cutting-edge UV-DTF Printer that seamlessly integrates printing and laminating functions into one efficient production printer. This 2-in-1 capability ensures a streamlined and high-speed printing process.

Industrial Speed & Efficiency:

Featuring an industrial UV lamp for instant curing, the

Aries 113 can print up to 6 square feet per hour (1.5m²) with 8 pass printing for production-level speeds. The dual Epson print heads and easy access design minimize cleaning and downtime, ensuring a smooth and efficient printing process.
