The Lawson

EXPRESS^{EX}

All Aboard the Success Express

The Lawson Express EX builds on 20+ years of Lawson's innovative high-speed automatics. The EX dramatically increases production, provides greater print consistency and minimizes the physical stress of manually printing – all while being extremely simple to use, set-up and maintain. The Express EX features AC Motor-Drive Print heads, state-of-the-art HMI interface, cassette screen loading, chopper-style squeegee & flood bar, quick-change platens and much more.

Fully automated print heads are combined with an integrated high-speed automatic carousel. Roller bearing registration at each print station ensures pinpoint registration and consistency. An intuitive, user-friendly, color touch screen is easy to understand and use, no special training is required.
