The Lawson
# SSR SYSTEM

On-Press, Portable 3-Point Registration System
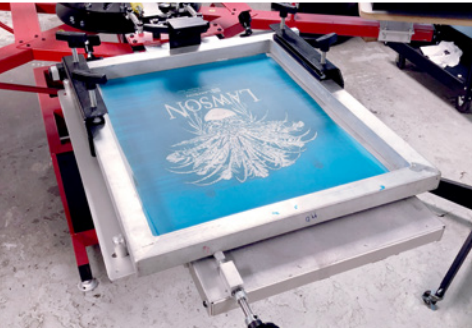

SSR System Registration Guides

Shown with Optional Floor Stand & Optional Vacuum System

Super Simple Screen Registration

Lawson's SSR System is a Super Simple Registration method integrating the Pre-Press Department, Screen Exposure and On-Press Registration for manual and automatic presses. No special tools, carrier sheets or frames are necessary. Use your existing aluminum frames.

The easy-to-use alignment board uses color coded grid lines to make your art alignment simple. Center Line is marked for both manual and automatic size frames.

The SSR is compatible with M&R Tri-Lock. 3-Point pins can be positioned for both manual and automatic size frames including panel frames and Newman Roller Frames.

Standard sizes include 20" x 24", 20" x 28" and 23" x 31".
