**Screen Reclaimer**

## Automatic Reclaiming for Small Shops

Shown with Door Open

### A Combo Economical Automatic Screen Reclaiming & Developing System

The Wash & Go is for small shops that want simple and easy screen automation. Designed for manual and automatic size screens (20"x24" and 23"x31" OD), the Wash & Go cleans, degreases and dehazes your screen at once, all at the same time.

The Wash & Go's small footprint means it fits anywhere and improves your quality of life. No longer will you be doing the most time-consuming, dirty and dreaded job in your own shop. Reclaim your screens (remove all ink and emulsion, degrease and dehaze) quickly and easily. Cycle time for one screen is approximately 120 seconds.

The Lawson Wash & Go Reclaimer uses less chemicals, making cost about 5 - 10 cents per screen.

Automated reclaiming provides consistency throughout the day by eliminating variables, such as operator attention deficit issues, operator fatigue, inadequate training and inconsistent application of standard operating procedures (SOP).

Lawson's Wash & Go is virtually maintenance free. Simply put the screen into the chamber and start the cycle. The automatic washer power washes out ink and emulsion.

# The Lawson **WASH & GO** Screen Reclaimer

## STANDARD FEATURES

- Compact Design
- High Quality Stainless Steel Spray Chamber
- Exclusive Dual-Action High-Speed Oscillating Nozzles
- Variable High Pressure Water Spray
- Use Frames up to 23" x 31" OD
- 230 Volts: 1-Phase

## OPTIONAL FEATURES

- Dip Tank
- Water Filtration System
- Inspection Booth
- Custom Filtration Systems for use with Septic Tanks
- Custom Designs on Request

Motor Detail

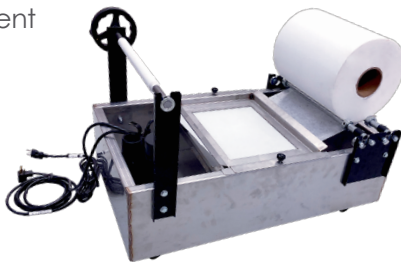

## Compimentary Products

### VC-Stainless Filtration System

#### TRIPLE-TIERED FILTERS FOR THE CLEANEST WATER

The Lawson VC-Stainless Filtration System removes harmful waste from the screen cleaning process. It protects your plumbing and the environment by filtering out contaminants like emulsion, tape, ink particles and other harmful solids. Water from your washout sink flows through a multi-stage filtration management system, specifically designed to trap harmful solids and particulate matter from entering your plumbing and your drainage system.

### Poly-Pro Deluxe Sink

#### DELUXE WASH OUT

Getting the best washout booth for screen printers is important for developing and reclaiming screens safely and efficiently. Featuring a backlit sink, shelving for storage and an over-spray hood, the Poly-Pro Deluxe provides the most productive way to develop and reclaim screen printing screens.

The Poly-Pro Deluxe is compatible with Lawson's filtration system to help protect your plumbing from large particles going down your drain.
