Arrow Belt™ & Bullseye Conveyor Belt Tracking System™

The Lawson
DIGI-STAR

Made for Lawson Conveyor Dryers

The Lawson Arrow Belt™ is designed to eliminate all "belt tracking issues". For the screen printer's ultimate peace-of-mind, you can set your new dryer in place, and never have to adjust for "belt creep" again.

If you can turn on a light switch, you can track this belt!

Lawson's unique Bullseye Conveyor Belt Tracking System™ allows the belt to track perfectly - even if the dryer is not level. Set the belt once, and never re-adjust.
