The Lawson
ZOOM-PRO

Shown with Standard Shelf and Floor Legs

Treat Yourself to Pre-Treat Automation

The Lawson Zoom-PRO might be the most sophisticated pretreat sprayer. Pretreat garments quickly, easily and consistently at the touch of a button (or foot pedal) – with zero "out-spray". The Color Touch Screen holds up to 40 programmable sequences for instant recall or use the bar code scanner to adjust spray amount and length with every garment. The Servo Drive spray head can automatically toggle between different speed and spray lengths and shirt orientation, providing instant, programmable operation.

Program for dark, light, poly and custom pretreat solutions, adjustable purge routines, cost calculator and many more automation features. The Zoom-PRO is for the DTG printer who demands the very best quality control for their workflow.

The Lawson Zoom-PRO features many cost-savings benefits and provides the ultimate in consistent spray applications. It works with every direct-to-garment printer's pretreat solution (including thicker polyester solutions) and we guarantee your satisfaction.
