The Lawson
TROOPER
EXPRESS

Model Shown:
2-Color, 6-Station

Express Yourself Without Complications

The Trooper Express combines dramatically increased production and greater print consistency with Lawson's engineered simplicity. Using AC Motor-Drive Print heads to power Lawson's exclusive dual-action squeegee, the Trooper Express prints on bags, t-shirts and everything in-between. The fully automated print heads are integrated with high-speed automatic carousel indexing to maintain production rates throughout the work day. Roller bearing registration ensures pinpoint registration and consistency. At only 8.5 feet in diameter, the Trooper Express can fit nearly anywhere on the production floor.

Your new Trooper Express ships fully assembled so there are no installation costs. Lawson also provides a 2-year parts warranty and 24/7 Technical Support for the life of the machine.

STANDARD FEATURES

- AC Motor Drive Print Head(s)
- Boom Control Box
- Standard Print Stroke: 14" (optional 18")
- Double Stroke
- Front & Rear Micro-Registration
- Air-Frame Clamps
- Adjustable Height Aluminum Platens with Rubber

The Lawson Trooper Express Provides:

- ✓ **Small Press Size:** This high-speed automatic fits in a small cramped area and through small door openings.
- ✓ **Simple and Easy to Use – Peace of Mind:** The Lawson Trooper Express is the easiest high-speed press to use and maintain on the market. It comes completely assembled so you can start printing immediately. Only common 120 volt electricity is required. Intuitive and simple controls without gimmicky bells & whistles, combined with standard parts, add to minimal maintenance and low total cost of ownership.
- ✓ **Use Your Existing T-Shirt Frames:** Use any size frame up to 23" x 31" O.D. Even your old manual frames (20" x 24") fit the Trooper Express. (Print sizes vary depending on screen size).
- ✓ **Auto-Balance Squeegee System:** Lawson's exclusive squeegee system automatically balances squeegee pressure from side-to-side, front-to-back and instantly adjusts itself to variations in garment thickness and platen heights.
- ✓ **Dual-Action Squeegee:** The Trooper Express uses a dual-action (flip-flop) industry standard aluminum squeegee holder.
- ✓ **Double Print:** This Trooper Express option allows you to simulate manual printing when you desire a double-print stroke.
