The Lawson
**TWIN
EXPRESS**

Direct-Drive DC Conveyor System

Easy 4-Point Belt Tracking

A Winning Combination

DESCRIPTION

Save space with the ultra-compact and portable Lawson Twin Express Combo Press/Dryer. This combo system has many of the amazing features of our standard series of presses and dryers, yet is specifically designed for those who want a space-saving solution. The Twin Express combines the best of two machines (the Lawson Proton and Mini-Star Dryer) and makes them one.

The all-steel construction and sturdy mechanical components make the Twin Express a great solution for any new start-up shop, prototype department, school, or small production shop. It's small and light enough for one person to move around – floor casters are included.

The Twin Express comes fully assembled, ready to print and dry. Micro-registration, adjustable platens, roller-bearing registration, adjustable spring tension, variable temperature control, adjustable belt speed and a fully insulated heat chamber are just a few of the standard features included.

ST. LOUIS | ATLANTA | NATIONWIDE
