

The Lawson Pro-Cure: Roll-In #2660

Increase your screen-making production and keep your screens clean and properly dried. This large thermo-air screen dryer accelerates screen drying by passing temperature controlled air over and under the screen. The warm air is pre-filtered and remains in constant motion to remove moisture, then evacuated through the bottom of the closet/chamber. Roll your emulsion-coated screens in and out with a “Roll-In Screen Rack,” or design your own shelving system. One large, light-safe door is provided for easy access.

S tandard Features

- Self-Contained
- Temperature-Controlled Air
- Filtered Air
- On/Off Heat Switch
- Easy-Access Door Opening
- Automatic Time Shut-Off
- Easy to Install; Through Any Door

O ptional Features

- Adjustable Roll-In Screen Racker (20 Shelves)
- Additional Heat Capacity
- 220 Volts; 1-Phase Wiring
- Extra Access / Flow-Through Door
- Digital Temperature Controls
- Special Sizes Available Upon Request

REASONS TO BUY A PRO-CURE RI

1. Increased Efficiency

Dry up to 20 screens at the same time! Screen drying time is dramatically reduced. Consistent heat, humidity and air velocity are assured.

2. Higher Quality Screens

Reduce pinholes and dirt and ensure the emulsion is thoroughly dry before exposure.

3. Affordable Price

The Lawson Pro-Cure RI is priced for maximum value, without sacrificing important features.
