After Hours: 314.382.9865 and press option #6
Website: www.golawson.com
Service EMail: service@golawson.com
General Information & Sales EMail: info@golawson.com

We have purposefully designed the Express EX to be *Intuitive* and User-Friendly. Most control functions can be understood simply by using the color touch screen.

To Get Started:
A) Turn the Master On/Off Switch ***On***

B) A Warning Message will appear for you to check the press and surroundings to ensure safety, and then Press the ***Safety Reset*** on the left menu bar. Now you have access to the entire suite of Press Functions & Options.

C) All of the Items on the Left Navigation Column are all "1-Touch" direct access Functions.
All of the Items on the Bottom are "Menu Access" functions, where options are selected and set depending on your job requirements.

D) Proceed and Press any of the Menu Items to set the job parameters you need. For example, Press *Heads* to turn individual print heads on, set print and flood speeds, set number of strokes, etc. Press *Flash* to establish where the Flash Unit(s) is located around the circle and Turn On as needed. Press *Timers* - we have already programmed the most popular settings - change as you may desire. Next, Press *SetUp* - this is where you will raise the carousel up and down to set your registration, test squeegee and flood pressures, test stroke lengths and more.

Help Menu contains Contact Info, Instructions, Maintenance, Troubleshooting, Diagnostics, and Videos.

If you have any questions, please call us - we are here to assist.
