HIGH-DEFINITION, INDUSTRIAL CTS IMAGING SYSTEM

The Lawson Express-Jet CTS v5 (computer-to-screen) is an easy to use industrial ink jet printer for any size shop. It ships fully assembled and can be ready to print within hours after arrival. The Express-Jet v5 features a moving gantry and the RIP software necessary to image any size screen up to 25" x 36" O.D. By incorporating Ricoh Gen V print head technology, you can print halftones up to 65 - 85 line, select your dot shape, resolution and ink deposit. Special UV inhibitor black ink ensures a dark, crisp image every time and average cost per screen is only 3 - 8 cents. Image quality is superior to the older model Ricoh Gen IV print heads.

Lawson's master frame carrier adjusts to fit all the standard frame sizes (20" x 24", 20" x 28", 23" x 31", 25" x 36") and any profile frame as well (square, roller or pin). Achieve nearly instant "on-press" registration with Lawson's 3-Point Register Guide, the M&R Tri-Loc® or other systems.
