

HIGH IMPACT PRODUCT

dB Matting 5mm is a shallow overlay treatment for improving impact sound transmission through a party floor. dB Matting 5mm is generally installed over a concrete floor to isolate impact transmission from the structure. dB Matting 5mm is an ideal solution to upgrade impact performance through a high mass floor structure.

	Impact Rating	47 dB L_{nTw}
	Thickness	5mm
	Sheet Dimensions	1 m x 20m
	Area	20m ²
	Eco Product	Yes

FEATURES

-  System reduces impact sound transmission
-  Is quick and easy to install fast and effective acoustic treatment
-  All floor finishes can be installed on dB Matting 5mm
-  Remains continually elastic thereby increases comfort of surface
-  Fully recycled
-  Document E Compliant
-  Suitable for Refurbishment and New Build
-  Good thermal conductivity - compatible with under floor heating systems
-  Good footfall noise reduction

All test data is site test data with suitable ceiling treatments & flanking paths removed. For more construction details for the test results please contact the office.
