

dB RD Flanking Strip

All test data is site test data with suitable ceiling treatments & flanking paths removed.
For more construction details for the test results please contact the office.

EDGE STRIP FOR PANEL

dB RD Flanking Strip has been designed to maintain acoustic isolation and seal all perimeters between dB Panel products and walls.

Used in Robust Details projects in conjunction with many Sound Insulation Store products and systems.

	Thickness	6mm
	Dimensions	20m x 100mm
	Area	20 Im
