

Platinum Hi-Res Display

As you play your hits, Numark provides an awesome feature that takes you into a new dimension with the Mixtrack Platinum: The custom 1.75" displays offer a colorful hi-resolution display enabling you to monitor information on bpm, platter position, time remaining, key lock, pitch adjustment, and keylock. (Ok—you can thank us later.) You can also switch between four decks and control which deck is active while creating a platinum mix.

What's the advantage of the display screen? You not only have the ability see your bpm and needle drop without looking at the laptop, you will also focus more on your performance without distraction.

The place is hot. The action is non-stop. You're the one in the driver's seat. We make sure you have the horsepower to get it done. Mixtrack Platinum will never let you down. We've kept everything you loved about the Mixtrack Pro 3, but now there's even more.

Mix With 4 Decks

You have a 4-deck layering advantage with the Mixtrack Platinum, and you can create a full digital mixtape or perform a Platinum mix. The new deck select function enables you to switch to the desired layered deck, giving you limitless possibilities to mix in loops, a capella's, and blend in songs seamlessly. You can monitor which deck you are on in the new custom 1.75-inch displays built into the jog wheels.

No Limits on Your Creativity

Dive into our 16 multi-function backlit performance pads and add loops, launch samples, and control hot cues to your performance. Use the multi-function touch strip for dynamic FX control and track search operation. There are dedicated filter knobs for each channel, to give you just the exact amount of tonal control you need for that perfect sound. If you can think it, Mixtrack Platinum will do it and take your creativity beyond to new heights.

We give you 100mm pitch sliders that make it easy to perform even the finest pitch adjustments, so it's easy to keep two cuts in perfect beat sync without any drift.

Jumpstart your inspiration with 6 sample packs from Prime Loops including over 380 premium instrumental loops, drum kits, one-shots, and more. A \$200 value.

Remix with the sounds of the world's premier electronic music label. Mixtrack Platinum gives you exclusive access to download studio-grade audio stems from the Toolroom Records catalog, allowing you the freedom to layer, tweak and chop today's most relevant sonic textures.

Made With Platinum Touch

Get precise control over every track and every transition with Mixtrack Platinum advanced low-profile rugged metal platters. Utilizing exclusive Numark technology, they are capacitive and dual-zone, giving you the ability to scratch or stop a track simply by touching the top of the platter, while at the same time allowing you to adjust the pitch by manipulating the platter from the side. The touch control is also intelligent, sensing your every motion and touch to ensure solid, reliable operation no matter how hot it gets! No other brand of controller has platters like these—only Numark! In addition, they're made from heavy-duty metal, so they stand up to the hottest action, night after night.

Total Serato Control

Mixtrack Platinum gives you comprehensive control over its included Serato® Intro software. Plus, it's class-compliant with both Mac and PC, so you'll be able to plug in and start mixing your music right away—no drivers or complicated set up necessary.

Serato DJ Intro

Simply plug-and-play—Serato DJ Intro and Mixtrack Platinum take the hassle out of setting up: connect your speakers to your Mixtrack Platinum and connect your Mixtrack Platinum to your laptop—it's that simple.

Gain Control – With 4 channels you have complete volume gain control to enable you to deliver a perfect mix. We added this feature because of the demand from DJs like yourself who wanted to have more control of their mixes.

Mix it up—Beatmatch and scratch music files from your computer like a pro with Serato DJ Intro's groundbreaking colored waveforms.

Get creative—Cue Points and Loops let you mark, access and repeat specific parts of a song, while Serato's DJ FX infuse your tracks with a range of professional effects like flanger, phaser, echo, and more.

Drop it—Drop air horns or entire tunes; the four-slot sample player will help you layer individual sounds to add even more fun to your sets.

Create professional-sounding mixes at home or performing live at parties, functions, and clubs. Mixtrack Platinum operates via standard MIDI, so it's compatible with virtually any popular DJ software.

Audio to Go

With its built-in 24-bit audio system, Mixtrack Platinum is ready to go right out of the box. Plug in your headphones, microphone and PA system and start mixing right away with no external audio interface needed. Plus, Mixtrack Platinum has two headphone jacks ($\frac{1}{4}$ -inch and $\frac{1}{8}$ -inch), making it easy to mix with friends and fellow DJs or trade off between sets.
